

INDCO POOL-KLOR

DIRECTIONS FOR POOL USE

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.

Scatter directly over surface of pool. Each ounce of product will provide approximately 0.4 p.p.m. of available chlorine in 10,000 gallons of water.

START UP

In a clean pool with no visible algae, bring chlorine residual to 3 to 3.5 p.p.m. as follows:

1. Add 3 oz. of Granules for each 10,000 gallons of water.
2. Test for chlorine residual, using a suitable test kit.
3. If chlorine residual is below 3 p.p.m., continue to add the Granules at a rate of 1 oz. per 10,000 gallons until this level is reached.

The day after your chlorine residual reaches 3 to 3.5 p.p.m., use cyanuric acid according to label directions to stabilize your pool.

Adjust pH to the ideal range of 7.2 to 7.6.

REGULAR CARE

Add 3 oz. of Granules for each 10,000 gallons every other day, or as needed to maintain your chlorine residual from 3 to 3.5 p.p.m. Frequency of application will depend upon number of people swimming, water temperature and other conditions.

ADDITIONAL POOL CARE RECOMMENDATIONS

pH—Maintaining pH in the ideal range of 7.2 to 7.6 is extremely important for full benefit of your chlorine and swimming comfort. Test the pH at least once a week with a suitable test kit. Adjust pH as necessary.

SUPERCHELORINATION—Keep your water sparkling clean by adding 11 oz. of this product per 10,000 gallons of water, at least once a week, especially during excessive heat, when bathing loads are high when water becomes dull looking or hazy, when there is a "chlorine" like smell or excessive eye irritation, or after heavy rains.

If algae appears, treat your pool with sodium hypochlorite pool treatment solution. Read and carefully observe the precautionary statements and all other information appearing on labeling for all pool products.

Before swimming, allow the pool to stand until the chlorine residual drops to 3 p.p.m.

STORAGE AND DISPOSAL

Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in a trash collection or dispose in approved landfill area, or bury in a safe place. **IN CASE OF CONTAMINATION OR DECOMPOSITION**, do not reuse container. If possible isolate area or in open air or well ventilated area. Flood with large volume of water, avoid breathing fumes. Dispose of contaminated material in an approved landfill or bury in a safe place.

DRY CHLORINATING COMPOUND

•• GRANULES ••

- Fast Dissolving
- Totally Soluble
- Protects against bacteria & algae
- Stabilized against sun attack for extended chlorine life

Active Ingredient:

Sodium dichloro-s-triazinetriene dihydrate..... 99%

Inert Ingredients 1%

Available chlorine 55%

DANGER

Keep out of reach of children.

See first aid statement and all ^{ACCEPTED} precautions on side panels. ^{with COMMENTS} EPA Letter Dated:

Net weight 50 pounds

AUG 1 1984

4875-15

PRECAUTIONARY STATEMENTS

Hazard To Humans and Domestic Animals

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, rubber gloves and use clean, dry clothes when handling. Irritating to nose and throat. Avoid breathing dust or fumes. Remove and wash contaminated clothing before reuse.

FIRST AID (PRACTICAL TREATMENT)

If swallowed: Feed large amounts of milk and/or water and induce vomiting. Call a physician immediately.

If on Skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

If in Eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention.

If Inhaled: Remove person to fresh air. Get immediate medical attention.

PHYSICAL AND CHEMICAL HAZARDS

STRONG OXIDIZING AGENT. Use only clean, dry vessels. Mix only with water. Do not add this product to any dispersing device containing remnants of any other product. Contamination with moisture, dirt, organic matter, or other chemicals (including pool chemicals) may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. Will BURN with evolution of chlorine and equally toxic gases. Avoid any contact with flaming or burning material such as a lit cigarette.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

TO DETERMINE POOL CAPACITY:

Rectangular Pools: Multiply length x width x average depth x 7.5 = pool capacity (U.S. gallons).

Round Pools: Multiply radius (ft. diameter) x radius x average depth x 2.25 = pool capacity (U.S. gallons).

In case of emergency involving this product, call collect, day or night, (314) 654-1600.

DIRECTIONS FOR POOL USE

of Federal law to use this product in any manner inconsistent with the labeling.

per surface of pool. Each ounce of product will provide 1 p.p.m. of available chlorine to 10,000 gallons of water.

START UP

with no visible algae, being chlorine residual to 1 to 1.5 p.p.m.

Granules for each 10,000 gallons of water.

to residual, using a suitable test kit.

level is below 1 p.p.m., continue to add the Granules at 10,000 gallons until this level is reached.

chlorine residual reaches 1 to 1.5 p.p.m., use cyanuric acid in accordance with the directions to stabilize your pool.

Ideal range of 7.2 to 7.6.

REGULAR CARE

Granules for each 10,000 gallons every other day, or on the same day as the residual is from 1 to 1.5 p.p.m. Frequency will depend upon number of people swimming, water temperature, and conditions.

ADDITIONAL POOL CARE RECOMMENDATIONS

pH in the ideal range of 7.2 to 7.6 is extremely important for your chlorine and swimming comfort. Test for pH each week with a suitable test kit. Adjust pH as necessary.

NOTE—Keep your water sparkling clean by adding 1/2 oz. per 10,000 gallons of water, at least once a week, as preventive treatment, when bathing loads are high, when water is cloudy or hazy, when there is a "chlorine" like smell or irritation, or after heavy rains.

1. Treat your pool with calcium hypochlorite pool treatment and carefully observe the precautionary statements and all directions appearing on labeling for all pool products.

2. Allow the pool to stand until the chlorine residual drops to 0.

STORAGE AND DISPOSAL

1. In tightly closed containers when not in use. Store in a well-ventilated area away from heat or flame. Do not store empty containers. Empty containers thoroughly with water to dissolve all remaining product. Place in a trash collection or dispose in accordance with local, state, or federal regulations. IN CASE OF CONTAMINATION, do not reuse containers. If possible isolate in air or well ventilated area. Flood with large volume of water. Dispose of contaminated material in an appropriate manner.
