DIRECTIONS FOR USE

AG. BURLEY LEAF TOBACCO SPRAY contains 1 lb. of Thiodan and 1 lb. of Malathion per gallon; formulated for the control of certain insects on tobacco when used as directed below. Do not use in undiluted form,

FIELD APPLICATION: to control aphids, cabbage looper, tobacco budworm, tobacco flea beetles and tobacco horn-worm – use 2 to 4 quarts per acre. Stink bug – use 2½ to 4 quarts per acre. Grasshopper – use 4 quarts per acre. Make concentration of not more than 1 quart in 15 gallon of water. Do not apply within 5 days of harvest. Make application when insects first appear and repeat at 3 to 5 day intervals depending upon the severity of the infestation and local conditions. Full coverage of plants during application is essential for good control.

Workers entering treated areas within 24 hours of application should wear protective clothing.

WARNING: Keep out of the reach of children. Hazardous if swallowed, inhaled or absorbed through skin. Do not breathe spray mist. Do not get in eyes, on skin or on clothing. In case of contact, immediately remove contaminated clothiny, and flush skin or eyes with plenty of water; for eyes, get medical attention. Wash thoroughly with soap and water after handling and before eating or smoking; wear clean clothing. Do not contaminate or store near feed or foodstuff.

This product is highly toxic to bees exposed to direct treatment of residues on crops. Protective information may be obtained from your Cooperative Agricultural Extention Service.

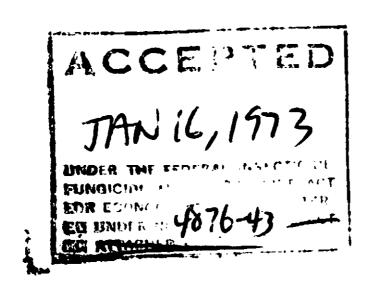

This product is toxic to fish and wildlife. Keep out of any body of water. Birds feeding on treated areas may be killed. Apply this product only as specified on this label.

Rinse equipment and containers and dispose of waste by burying at least 18" deep in non-crop areas away from water supplies. Containers should be disposed of by punching holes in them and burying with waste.

Do not allow this material to drift onto neighboring crops or non-crop areas or use in a manner or at a time other than in accordance with label directions because animals, plant or crop injury, illegal residue or other undesirable results may occur.

NOTE TO PHYSICIANS: Malathion may cause cholinesterase inhibition. Atropine is antidotal; Endosulfan is central nervous system stimulant. Treat symptomatically. There is no specific antidote.

Our recommendations for use of this product are based upon tests believed to be reliable. The use of this product being beyond the control of the manufacturer, no guarantee, expressed or implied, is made as to the effects of such or the results to be obtained if not used in accordance with directions or established safe practice. The buyer must assume all responsibility, including injury or damage resulting from its misuse as such, or in combination with other materials.
