

GENERAL INFORMATION

TOBACCO TRANSPLANTER SOLUTION is a Lindane formulation for use in transplanting water against wireworms. Tobacco Transplanter Solution is especially formulated to mix with water and stays in suspension without agitation during the transplanting operation. Tobacco Transplanter Solution used in transplanting water establishes a protection against wireworms around the roots of newly set plants. This allows the roots to develop and plants to become established.

DIRECTIONS FOR USE

TOBACCO: To control wireworms use 2 fluid ounces in 50 gallons of transplanting water. Apply 200 to 250 gallons per acre.

If adding to tank while partially filled, use a smaller amount to keep from building up transplanter solution concentration. Use only as directed. Do not make up concentration and dip tobacco roots into solution as root damage may occur.

NET CONTENTS 1 GALLON

E.P.A. Reg. No. 4876-49

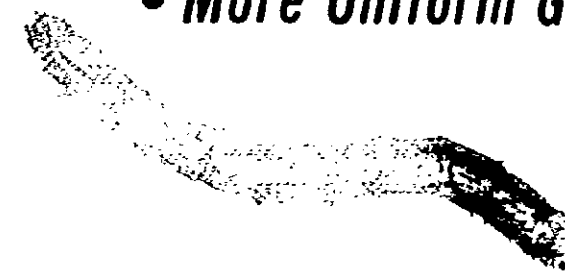

TOBACCO Transplanter Solution

(CONTAINS LINDANE)

FOR CONTROL OF:
WIREWORMS - CUTWORMS

- Protects Plant Roots
- Reduces Re-Setting
- More Uniform Growth

CAUTION: Keep Out Of Reach Of Children
See Side Panel For Additional Cautions

ACTIVE INGREDIENT:

Lindane (gamma isomer of benzene hexachloride) 10%

INERT INGREDIENTS: 90%
