

DIRECTIONS

NOTE: Rotenone is registered for use by or under permit from appropriate State and Federal Fish and Wildlife Agencies.

FISH PONDS: Stephenson's 5% Cubé Dust will eliminate fish prior to stocking or restocking of ponds. This material should be applied under the guidance or supervision of State or Federal Wildlife Agencies.

Mix $6\frac{3}{4}$ pounds of this material in 5-10 gallons of water and apply to 5 acre-feet of water (25 parts per billion rotenone) by pumping the solution into the wake of an outboard motorboat to stir into the surface of the water to be treated. For deep water, use a weighted hose as a siphon from the solution container to the bottom of the water to be treated.

To calculate the total acre-feet: multiply the surface area (in acres) by the average depth in feet. To calculate the pounds of Stephenson's 5% Cubé Dust to apply: multiply acre-feet by parts per billion rotenone desired by .054. For catfish and other hard-to-kill species apply the above quantity to $2\frac{1}{2}$ acre-feet (50 parts per billion rotenone). Affected fish usually begin to rise to the surface within an hour. High temperatures and alkaline water conditions cause rapid degradation of rotenone. Optimum results will be achieved when water temperature is approximately 70° F.

Delay restocking for 2-4 weeks after treatment. To determine if water is safe for restocking: place a sample of fish to be stocked in wire cages in the coolest part of the water. If fish are not killed within 24 hours, the water may be restocked.

CONTAINER DISPOSAL: Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place.

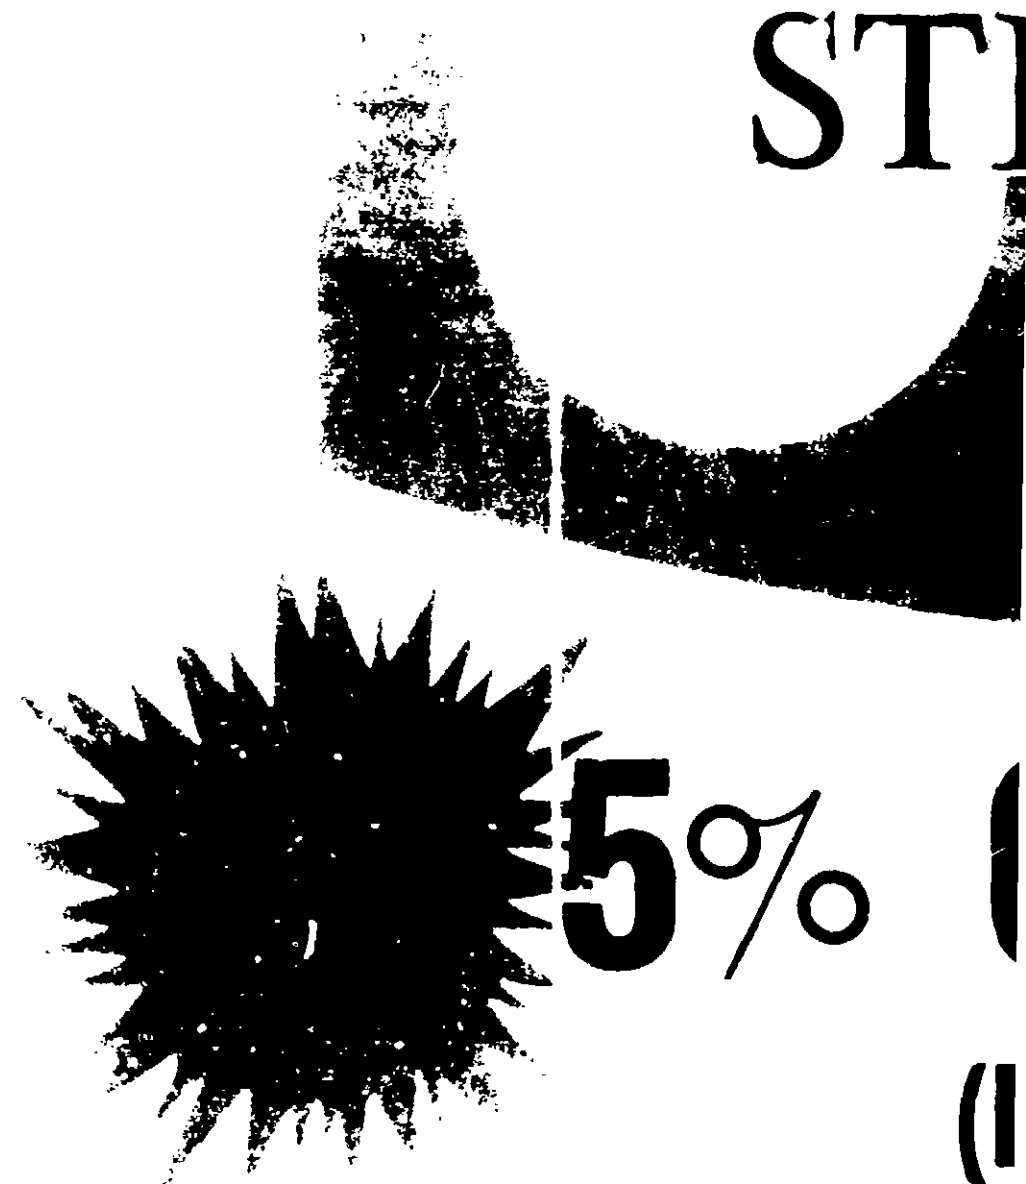

CAUTION

AVOID INHALATION OF DUST. HARMFUL IF SWALLOWED. AVOID CONTACT WITH SKIN. WEAR CLEAN, PROTECTIVE CLOTHING.

OBTAIN A PERMIT FROM THE STATE GAME AND FISH DEPT. BEFORE USING THIS ROTENONE AS A FISH POISON. IT IS A VIOLATION OF STATE LAWS TO USE ROTENONE AS A FISH POISON IN RUNNING STREAMS, PUBLIC LAKES, OR WITHOUT THE CONSENT OF THE OWNER OF A PRIVATE POND.

PURCHASERS ARE HEREBY WARNED THAT SUCH MISUSE OF THIS MATERIAL MAY RESULT IN PROSECUTION.

DIRECTIONS

For use in ponds, lakes, and streams, mix 1/4 ounce of this material with 1 gallon of water and apply to the water (25 parts per billion) by pumping the solution into the wake of an outboard motorboat to stir into the surface of the water to be treated. For large water, use a weighted float to distribute the solution to the bottom of the water to be treated.

To calculate the amount of material to use, multiply the surface area of the pond in feet by the depth in feet to calculate the pounds of water in the pond. To apply 25 parts per billion by parts per billion, multiply the pounds of water by 25 parts per billion and divide the result by 100,000,000 to get the amount of material to use. Apply the material to the surface of the water.

CAUTION

AVOID INHALATION OF DUST. HARMFUL IF SWALLOWED. AVOID CONTACT WITH SKIN. WEAR CLEAN, PROTECTIVE CLOTHING.
 OBTAIN A PERMIT FROM THE STATE GAME AND FISH DEPT. BEFORE USING THIS ROTENONE AS A FISH POISON. IT IS A VIOLATION OF STATE LAWS TO USE ROTENONE AS A FISH POISON IN RUNNING STREAMS, PUBLIC LAKES, OR WITHOUT THE CONSENT OF THE OWNER OF A PRIVATE POND.
 PURCHASERS ARE HEREBY WARNED THAT SUCH MISUSE OF THIS MATERIAL MAY RESULT IN PROSECUTION.
 DO NOT CONTAMINATE WATER BY CLEANING OF EQUIPMENT OR DISPOSAL OF WASTES. APPLY THIS PRODUCT ONLY AS SPECIFIED ON THIS LABEL.
 NOTICE: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
