

DIRECTIONS

"FOR SPOT APPLICATION ONLY"

COCKROACHES — A 2% spray provides a residual surface for 60 to 90 days and is non-repellant. Spray or paint selected surfaces where roaches and waterbugs hide or run.

ANTS — Spray or paint in house with 2% solution wherever ants are seen, or may enter. Repeat as necessary.

FLIES AND MOSQUITOS — Treat outdoor porch areas, and selected surfaces indoors such as screens, doors, windows and areas where these insects tend to congregate. Also this controls spiders and silverfish by application to surfaces where they are found. Repeated applications should be made as often as necessary to maintain an effective deposit of toxic residue. (2% solution).

CARPET BEETLES — Remove rugs or carpets and spray backs thoroughly. Also spray localized areas of floors and baseboards with particular attention to cracks or crevices where beetles may hide. Repeat as necessary to maintain adequate control.

DO NOT APPLY TO LAWNS, PLANTS, TREES OR SHRUBS.

CONTAINER DISPOSAL: Do not reuse empty containers. Crush and bury at least 18 inches deep in a safe place away from water supplies.

CAUTION

FIRE HAZARD. DO NOT SPRAY INTO OR NEAR FIRE OR OPEN FLAME.

DIRECTIONS

"FOR SPOT APPLICATION ONLY"

COCKROACHES - Apply to cracks and crevices, under sinks, behind stoves, and in other areas where cockroaches are known to hide. Apply liberally and repeat as necessary.

FLIES AND MOSQUITOS - Apply to areas where flies and mosquitoes are known to breed, such as in garbage cans, under sinks, and in other areas. Apply liberally and repeat as necessary.

CARPET BEETLES - Apply to areas where carpet beetles are known to infest, such as in closets, under carpets, and in other areas. Apply liberally and repeat as necessary.

DO NOT APPLY TO LAWNS, PLANTS, TREES OR SHRUBS

CONTAINER DISPOSAL - Do not reuse empty containers. Crush and bury in a safe place away from water supplies.

CAUTION

FIRE HAZARD. DO NOT SPRAY INTO OR NEAR FIRE OR OPEN FLAME.
