Net Wt. 1 Lb.

**SNAIL AND SLUG BAIT**

**DIRECTIONS**

This product may be used on lawns and around ornamentals. It may be used to treat the soil around **beans, cabbage, cucumbers, melons, okra, squash and tomatoes** but must not contaminate the edible parts.

Broadcast at the rate of 1/2 lb. per 1000 sq. ft. for the control of snails and slugs. For the best results, dust should be applied at night with at least 3 applications at 7-10 day intervals. If possible, it should not be applied just before a rain which may wash it away or reduce effectiveness. Good sanitation and removal of loose boards, bricks, trash piles or other material which might shelter will add to the effectiveness of the control measures. This bait is to be applied to the soil around plants but not to the foliage. Do not apply around beans and okra after the pods start to form. Do not apply around cabbage, cucumbers, and tomatoes, melons and squash after the edible parts start to form.

<b>ACTIVE INGREDIENTS</b>	
Metalddehyde	5.0%
*Technical Chlordane	5.0%
<b>INERT INGREDIENTS</b>	
	90.0%
<b>TOTAL</b>	
	100.0%
