(14pt) DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Every set consists of two coils.

(1) Separate the coils with care. Hold the comma-shaped end of one of the coils between two fingers as shown in the illustration. Shake it lightly over the palm of the other hand and it will be easily separated.

(2) Use one coil at a time by placing it on the metal stand provided in the box. Insert the holder tip into the hole at the center. Then, light the outer end of the coil.

(3) Any broken piece of coil may be used by inserting it in the open gap in the holder as illustrated.

Mosquitos will be repelled when used as directed on porches or similar areas where there is little movement of air.
