EFFINGHAM, ILLINOIS

DIRECTIONS:

For Dairy Cows and Beef Cattle, GOOD-LIFE VA-DRIN is a ready-to-use solution and may be used in all types of livestock oilers. In automatic oilers, refill when necessary and make available continuously to Beef and Dairy animals. With burlap oilers, use 1 gallon of solution to 20 feet of burlap surface. Do not let burlap go dry.

IMPORTANT: Locate oilers where cattle loaf, usually in shady spots near water supply. GOOD-LIFE VA-DRIN solution may also be used full strength as a spray. Apply as a fine mist each day to cover entire animal, including legs. Do not apply more than 2 ounces per animal per day.

As a spray to control flies in agricultural premises such as dairy barns, barns, fences, fly breeding areas and other farm buildings, apply as a coarse droplet spray to wet the surface of walls, ceilings, rafters and floors using 1 gallon per 1000 square feet of surface. Do not contaminate food, feed, utensils or drinking water.

CAUTION: Harmful if swallowed, inhaled or absorbed through the skin. Avoid prolonged or repeated inhalation of mist and contact with skin. If swallowed, induce vomiting immediately and get medical attention. In case of contact with skin or eyes, flush with plenty of water, for eyes get medical attention.

Wash thoroughly with soap and water after handling and before eating or smoking. Do not contaminate feed, water or foodstuffs. KEEP OUT OF REACH OF CHILDREN
