NOTE TO PHYSICIAN: Carbaryl is a moderate, reversible cholinesterase inhibitor Atropine is antidotal for carbaryl and malathion.

Environmental Hazards

Toxic to fish; keep out of any body of water. Use only as specified on this label. This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not reuse empty container. Wrap container and put in trash collection.

HOW TO USE

GOOD-LIFE VEGETABLE AND TOMATO DUST OR SPRAY

This product may be used as either a Dust or Spray

Apply thoroughly to upper and lower surfaces of all foliage. Protect plants from early insect and disease damage. Repeat at 7 day intervals or as necessary. DO NOT APPLY WITHIN 14 DAYS OF HARVEST

FOR COMMERCIAL APPLICATORS - Apply as a dust at the rate of 25 to 35 pounds per acre; as a spray, mix 25 to 35 pounds in 50 to 70 gallons water per acre. Provide continuous, vigorous agitation.

DUST: Dust on plants covering leaves evenly and lightly. Apply when air is still and plants are dry. Best coverage is obtained by use of a good dust gun.

SPRAY: Mix 4 ounces (12 tablespoonsful) in 1^4 gallons of water. Keep agitated while spraying. Apply as a wetting mist with either a pressure or hand type sprayer.
