Ms. Dollie Howser
Regulatory Specialist
West Agro, Inc.
11100 N. Congress Ave.
Kansas City, MO 64153

Subject: **Dyne**
EPA Registration No. 4959-9
Application dated April 23, 2003

Dear Ms. Howser:

The revised labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable.

Proposed Amendment

- revised labeling (per PR Notice 2001-1)

Label Comments

With respect to the "Storage and Disposal" statement, the following statement must be added immediately below the subheading:

"Do not contaminate water, food, or feed by storage or disposal."

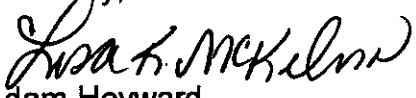

General Comments

Submit three (3) copies of your final printed labeling bearing the revision stated above. A copy will be stamped and returned for your record.

2/3

Should you have any questions or comments concerning this letter, please contact me at (703) 308-6422, or Lisa McKelvin at (703) 308-7496.

Sincerely,

Adam Heyward
Product Manager (34)
Regulatory Management Branch II
Antimicrobials Division (7510C)

Enclosure

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FARM USE

- **PRE-FLUSH.** Immediately after milking, remove gross food particles and soil with a 110°F potable water pre-flush, or when necessary, a pre-soak treatment prior to a pre-flush. Thoroughly flush the entire pipeline and discharge to drain. Do not recirculate rinse water.
- **CLEAN.** Thoroughly wash all surfaces with Dynemate cleaner following label directions.
- **ACID RINSE.** Rinse line thoroughly after the cleaning cycle with lukewarm potable water solution containing 1 ounce Dyne per 10 gallons of water.
- **SANITIZE.** Immediately before milking, sanitize the system with a lukewarm solution containing 1 ounce Dyne per 10 gallons of water, allowing a contact time of 2 minutes. This solution provides 12 1/2 ppm titratable iodine. For spray applications, use 1 ounce of Dyne to 5 gallons of water providing 25 ppm titratable iodine. Thoroughly drain system.

Important: Follow State and Local Health Department requirements for sanitizing milking equipment.

Dyne is its own indicator of germicidal activity. The amber or yellow color shows the presence of the active ingredient - iodine. Not adversely affected by common types of water hardness or by cold water.

STORAGE AND DISPOSAL

STORAGE: Keep container closed when not in use. Do not store below 0°F for extended periods.

PESTICIDE DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Pesticide wastes are acutely hazardous. Improper disposal of pesticide wastes or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

! DANGER

PRECAUTIONARY STATEMENT: HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

DANGER: CORROSIVE. Causes eye and skin damage. Do not get in eyes, on skin or clothing. Wear protective goggles or face shield and rubber gloves when handling. Harmful or fatal if swallowed. Wash thoroughly with soap and water after handling.

PHYSICAL AND CHEMICAL HAZARDS:

Mix only with water following label directions. Do not mix with chlorinated cleaners or sanitizers. Toxic chlorine gas will be formed. Contact with soft metals may generate hydrogen gas. Do not

use or store near heat or open flame.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Keep out of lakes, ponds or streams. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing. Call a Poison Control Center or doctor for treatment advice.

IF ON SKIN: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for treatment advice.

IF SWALLOWED: Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the Poison Control Center or doctor. Do not give anything to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a Poison Control Center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-424-9300 for emergency treatment.

NOTE TO PHYSICIAN

Probable mucosal damage may contraindicate the use of gastric lavage.
