Kansas City, MO 64153-1222

Attention: Cindy Emmons

Gentlemen:

Subject: 222 Disinfectant
EPA Registration No. 4959-16
Your letter dated April 25, 1988

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable subject to the comment listed below. Five copies of the finished labeling must be submitted.

- Delete "... drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available ..." under the Statement of Practical Treatment, If swallowed"

Sincerely yours,

Jeff Kempter

ZZZ
DISINFECTANT

RECOMMENDED FOR CLEANING, DISINFECTING AND SANITIZING IN HOSPITALS, INSTITUTIONS, FOOD PLANTS AND COMMERCIAL BUILDINGS.

- ZZZ DISINFECTANT is Tuberculocidal when used on precleaned non-porous surfaces. Prepare a dilution of 3 ounces of ZZZ DISINFECTANT to 5 gallons of water at 20°C (or warmer).
- ZZZ DISINFECTANT is not adversely affected by hard water (up to 400 ppm). Use a dilution of 6 ounces ZZZ DISINFECTANT to 5 gallons in hard water.
- ZZZ DISINFECTANT is not adversely affected by low water temperatures (as low as 5°C). Use a dilution of 6 ounces ZZZ DISINFECTANT to 5 gallons in cold water.
- ZZZ DISINFECTANT has its own built-in indicator of germicidal activity. A fresh solution should be prepared daily or when there is a noticeable change in the amber color.

ACTIVE INGREDIENT:	
Titratable Iodine.....	1.75%*
Phosphoric Acid.....	16.00%
INERT INGREDIENTS:.....	82.25%
Total 100.00%	

* From Alpha-(p-nonylphenyl)-omega-hydroxypoly(oxyethylene)-iodine complex

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals
Keep Out of Reach of Children

Danger:

CORROSIVE, CAUSES EYE DAMAGE AND SKIN IRRITATION. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Harmful if swallowed. Avoid contamination of food.

in EPA Letter Dated _____

AUG 17 1988

Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.

ZZZ DISINFECTANT

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Not for residential use. For general cleaning and disinfecting use 3 ounces of ZZZ DISINFECTANT to 5 gallons of water. For hospital use or at low water temperatures (as low as 5°C), use 6 ounces of ZZZ DISINFECTANT to 5 gallons of water. Remove heavy soil deposits before application of the disinfecting solution.

For sanitizing previously cleaned food contact surfaces, use 1 ounce of ZZZ DISINFECTANT in 5 gallons of water. This dilution provides 25 ppm titratable iodine.

Hospitals: Use as recommended above in animal rooms and cages, cafeterias, commercial freezers, morgues, laboratories, operating areas, patient rooms, bedframes, walls and floors, thermometers, and rubber gloves. Allow at least 10 minutes contact time, then drain surface but do not rinse. Follow directions for food plants when using on food-handling surfaces.

Surgical and Medical Instruments: Surgical/medical instruments, tubing and catheters should be previously cleaned to remove all adhering blood and serous exudates before disinfecting. Flush and fill the lumen of hollow instruments, avoiding entrapment of air bubbles. Then immerse the equipment in a solution of 6 ounces ZZZ DISINFECTANT in 5 gallons of water, allowing at least 10 minutes of contact time.

Food Plants: To sanitize food-processing equipment and utensils, which were first washed in a suitable detergent and rinsed in potable water, use 1 ounce of ZZZ DISINFECTANT in each 5 gallons of water. Spray or immerse equipment, allowing solution to remain on surfaces for a minimum of one minute. Then drain but do not rinse. When used at this dilution (1:640), ZZZ DISINFECTANT does not require a potable water rinse in accordance with the Federal Food Additive Regulation 178.1010.

Commercial Building, Institutions and General Housekeeping: Use 3 ounces of ZZZ DISINFECTANT per 5 gallons of water for cleaning and disinfecting floors, walls, lavatories, shower rooms, refuse containers, kitchen areas and lunch rooms. Allow at least 10 minutes contact time. At low water temperatures (as low as 5°C) use 6 ounces to 5 gallons of water. Follow directions for food plants when using on food handling surfaces.

STATEMENT OF PRACTICAL TREATMENT

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call physician. Remove and wash contaminated clothing before reuse.

If swallowed, ~~drink promptly~~ a large quantity of milk, egg whites, gelatin solution, ~~or if these are not available~~, drink a large quantity of water. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.

STORAGE AND DISPOSAL

Keep container closed when not in use. Do not store below 25°F or above 100°F for extended periods.

PROHIBITIONS: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.
