APPLICATION INSTRUCTIONS:

FOOD PROCESSING AND DAIRY EQUIPMENT:

Remove gross food particles and soil by a pre-flush or pre-scrape and when necessary, pre-soak treatment. Clean all surfaces with an appropriate chlorinated alkaline cleaner, followed by a potable water rinse prior to the application of the sanitizing solution.

Sanitize equipment prior to use with a solution of 1 oz. **ECONOSAN ACID SANITIZER** per 6 gallons of water, to provide 90 ppm of decanoic and nonanoic acid. Circulate sanitizing solution through CIP or COP systems for a minimum of 2 minutes contact time. Sanitizing solution must have a pH of 4 or below. Adequately drain solution. For mechanical operations, the prepared use solution may not be reused for sanitizing, but may be re-used for other purposes such as cleaning. For manual operations, fresh sanitizing solution should be prepared daily or more often if the solution becomes dirty or soiled.

Follow state and local Health Department regulations for cleaning and sanitizing food processing and dairy equipment.

Regular use of **ECONOSAN ACID SANITIZER** will prevent formation of milk-stone and mineral stone on food contact surfaces.
