## **DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

### **FOOD PROCESSING AND DAIRY EQUIPMENT:**

Remove gross food particles and soil by a pre-flush or pre-scrape, and when necessary, a pre-soak treatment. Clean all surfaces with a chlorinated alkaline cleaner, followed by a potable water rinse prior to the application of the sanitizing solution.

Sanitize equipment prior to use with a solution of 1 ounce MEGA-SAN per 6 gallons of water, to provide 90 ppm of decanoic and nonanoic acid. Circulate sanitizing solution through C.I.P. and C.O.P. systems for a minimum of 2 minutes. Sanitizing solution should have a pH of 4 or below. Completely drain solution and allow to air dry. For mechanical operations, the prepared use solution may not be reused for sanitizing, but may be reused for other purposes such as cleaning. For manual operations, fresh sanitizing solution should be prepared daily or more often if the solution becomes dirty or soiled.

Follow State and local Health Department regulations for cleaning and sanitizing food processing and dairy equipment.

Regular use of MEGA-SAN will prevent the formation of milkstone and mineralstone on food contact surfaces.
