

DIRECTIONS FOR USE

1. Clean and rinse all equipment prior to disinfecting.
2. When used as a bactericide for dairy utensils, milking machines and equipment, use 1½ ounce per 3½ gallons of water. This solution can also be used for washing cow's udder and the milker's hands. Test frequently to maintain a concentration above 50 PPM.
3. When used as a disinfectant for equipment, in food and beverage plants, use a solution of 1 pound per 40 gallons of water and apply in such a manner that all parts and surfaces are properly reached with solution.
4. For domestic and household, use a solution of 1 ounce per gallon of water for disinfecting glasses, dishes, etc. For cleaning and deodorizing of porcelain and enameled surfaces such as sinks, refrigerators, etc., use a solution of 1 ounce per quart of water.

TABLE OF DOSAGE

Parts per Million of Chlorine	Ounces per Gallon of Water	Level Tablespoon per Gallon of Water
50	1½	½
100	1½	1
200	1	2
500	2	5
1000	4	10
