ONE LITER QUART

**DIRECTIONS FOR USE
 FOR SPOT APPLICATION ONLY
 SHAKE BEFORE USE**

GENERAL: Dursbalein with synergized pyrethrum insecticide used as a spot treatment to control cockroaches, silverfish, spiders and other insects specified below. Using a suitable sprayer, apply as a coarse spray to localized areas where pests may occur. Spray until wet. Repeat as needed.

TO KILL COCKROACHES, ANTS, CRICETS, SILVERFISH, SPIDERS AND COWBOYS: Spray areas where the pests are found or in a hide. Spray dark corners of rooms and crevices, cracks and crevices in walls, along baseboards and door and window frames, behind and under beds, sofas, refrigerators and cabinets, in and around garages, and along and other utility installations. Pests driven out of their harbors should be sprayed directly. For ants apply to ant trails. Spray around doors and windows and wherever else these pests may be harbored. Repeat as necessary.

TO KILL BROWN DOG TICKS AND FLEAS: Thoroughly apply as a spot treatment to infested areas such as pet beds and resting quarters, under chairs and crevices, along and behind baseboards, window and door frames, and localized areas of floor and floor coverings where these pests may be present. Old bedding should be removed and replaced with clean, fresh bedding after treatment. Do not spray pets with this product.

FLEES AND MOSQUITOES: Use only out of doors as indicated during the above directions. Spray outside surfaces of windows and door frames, as well as other areas where these pests may enter the home. Do not spray dark corners and sheltered areas where these pests may be harbored. Do not spray pet and animal areas where these pests may be present. Repeat treatment as necessary.

TO KILL CARPET BEETLES AND CLOTH MOTH: Spray along the perimeter of the infested area and along the edges of the carpet or clothing. Repeat treatment as necessary.
