ENVIRONMENTAL HAZARDS  
PHYSICAL AND CHEMICAL HAZARDS**

**CAUTION**  
**Keep Out of Reach of Children**  
May be harmful if swallowed, inhaled, or absorbed through skin. Avoid inhalation of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes and clothing should be avoided. Wash thoroughly with soap and water after handling. Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. If poisoning occurs, get prompt medical aid. Remove pets and cover fish bowls before spraying. **DO NOT USE, SPILL OR STORE NEAR HEAT OR OPEN FLAME. NOTE TO PHYSICIAN:** Treat symptomatically. Atropine is an antidote.  
Do not spray in air in room or use on plants. Apply as a surface spray only as specified on this label.  
Do not allow children or pets to contact treated surfaces until spray has dried. This product is toxic to fish. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not re-use empty container. Destroy when empty and discard in a safe place. Keep container closed. Keep away from food, foodstuffs, and domestic water supplies.

**Disposal**  
Do not reuse empty container. Wrap container and put in trash collection.

**FOR SPOT APPLICATION ONLY**

**GENERAL:** This is a concentrated formula. Mix Only Enough For Immediate Use. Shake well first. Mix one part D-K2 to nine parts (one ounce to nine ounces) of water. Mix vigorously for at least one minute. Re-mix as using. Baygon with synergized pyrethrins is an insecticide to be used as a spot treatment to control cockroaches, silverfish, ants, spiders, and other pests specified hereon. Using a suitable sprayer, apply as a coarse spray (large droplets), to localized areas where pests may occur. Spray surface until wet. Re-treat as needed.

**TO KILL COCKROACHES, ANTS, CRICKETS, SILVERFISH, SPIDERS AND SOWBUGS:** Spray areas where these pests are found or may hide, including dark corner of rooms and closets; cracks and crevices in walls, along baseboards and door and window frames; behind and beneath sinks, stoves, refrigerators and cabinets, in and around garbage cans, plumbing and other utility installations. Pests driven out of hiding places should be sprayed directly. For ants apply to ant trails, also around doors and windows and pipe and cracks. Repeat as necessary.

**TO KILL BROWN DOG TICKS AND FLEAS:** Thoroughly apply as a spot treatment to infested areas such as pet beds and resting quarters, nearby cracks and crevices, along and behind baseboards, window and door frames and localized areas of floor and floor coverings where these pests may be present. Old bedding should be removed and replaced with clean, fresh bedding after treatment. Do not spray pets with this product.

**FLIES AND MOSQUITOES:** Use only out-of-doors as an aid in reducing annoyance from these insects. Spray outside surfaces of window and door frames as well as other areas where these pests may enter the home. Also spray dark corners and localized resting areas (such as under eaves) or porches, patios and garages where these insects may congregate. Flies and mosquitoes coming to rest on treated surfaces will be killed. Repeat treatment if necessary.
