

**PRECAUTIONARY STATEMENTS**  
**HAZARDS TO HUMANS (AND DOMESTIC ANIMALS)**

**CAUTION**

CAUTION: Harmful if swallowed. Contact with skin can cause skin symptoms. Avoid breathing vapors or spray mist. In case of contact with skin, wash with soap and water. Avoid contamination of food and feedstuffs. Keep out of reach of children.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish, birds and other wildlife. Birds feeding on treated areas may be killed. Keep out of lakes, streams and ponds. Do not apply where runoff is likely to occur. Do not apply when weather favors drift from treated areas. Do not contaminate water by cleaning of equipment or disposal of waste. Apply this product as specified on its label.

**PHYSICAL OR CHEMICAL HAZARDS**

Do not use near open flame or heat source.

**DIRECTIONS FOR USE (SUBTERANEAN TERMITES)**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**DIRECTIONS FOR USE**

Use Redwood 46% Chlordane in a 1% water emulsion (One gallon of 46% Chlordane to 30 parts of water to 1% emulsion).

**STORAGE & DISPOSAL STATEMENT**

**DISPOSAL**

DO NOT REUSE EMPTY CONTAINER. BOTTLE CAN, BUCKET, WRAP CONTAINER AND PUT IN TRASH COLLECTION.

**REDWOOD**  
**46% CHLORDANE,**  
**WATER MISCIBLE**

Active Ingredients	by weight
Technical Chlordane*	46.0%
Petroleum Hydrocarbons	50.0%
Non-Ingredients	4.0%
<b>TOTAL</b>	<b>100.0%</b>

\*Equivalent to 27.4% Octachloro-7-Methylnonahydrophenanthrene and 18.6% related compounds.

**THIS PRODUCT CONTAINS 4 LBS TECHNICAL CHLORDANE PER GALLON**

**KEEP OUT OF REACH OF CHILDREN**  
**CAUTION!**

If on skin: Wash with soap and water. If eye contact: Flush with water for at least 15 minutes. If swallowed: Call a physician immediately.

**SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.**

**SUBTERANEAN TERMITES — DIRECTIONS FOR USE**

**PERMITE CONTROL IN EXISTING STRUCTURES**  
 buildings with Subterranean or Foundation Termites

First remove all wood debris and wood forms. Apply this emulsion to the interior surfaces of foundations of poured concrete walls 6 inches wide and 6 inches deep. For brick and masonry foundations dig the trench about 12 inches deep. If digging is more than 12 inches deep make holes with a crawler pipe or a rod about one foot apart that extend from the trench bottom to the top of the footing. Make holes closer in hard packed clay soils. NEVER DIG BELOW THE TOP OF THE FOOTING. Apply the emulsion (or solution) in the trench at a rate of 4 gallons per 10' linear feet per foot of depth. Apply half of this to the backfill. Leave the trench along the inside of foundations or crevices. Seal gaps. Cover treated soil with a thin layer of untreated soil.

For void patches, terraces, and entrance ways, drill holes at one foot intervals 6 inches from the foundation, and pour one-half gallon of emulsion (or solution) into each hole. Drill holes 5 feet with heat ducts or rotating heat pipes should be treated by a commercial pest control operator.

The object is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly where an insecticide is applied to basements or sub-type construction. It is suggested that you consult the Agricultural Cooperative Extension Service for advice or consult a commercial pest control service.

Avoid contamination of public and private water supplies by observing these precautions. Do not allow a hole or any type of small opening to reach into the termite chemical solution while filling or mixing in a material with water. Use only a filter or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing supply stores. Use of anti-siphonage equipment will help to insure that the use of this toxic chemical will not contaminate domestic water supplies. Refer to Federal (Federal Housing Administration) state and local specifications for safe disposal of all treatment areas from which soil in the vicinity of water systems or ponds should not be treated if it is water saturated, subject to excess moisture due to an accumulation of water or if the soil to be treated is within the perimeter of the structure or if a grate super than surrounding soil or property area. If this is the situation treat as follows: Do not apply Under Pressure. Soil should be removed to an area safe from use or disposal. Water contamination is treated, exposed to wind and sunlight for two to four hours then returned to the field which has been used with a plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain chlorinated hydrocarbons.

P.O. Box 45916  
Houston, TX 77045

Attention: Grady Lee

Gentlemen:

Subject: Termiticide L.I.P.  
Keewood 46% Chlordane Water Miscible  
EPA Registration No. 4981-5  
Your Application of February 23, 1982

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records.

At the next label printing, incorporate the following revisions:

1. Revise the Statement of Practical Treatment to read:

STATEMENT OF PRACTICAL TREATMENT

- If swallowed - Call a physician or Poison Control Center immediately. Gastric lavage is indicated if material was taken internally. Do not induce vomiting: vomiting may cause aspiration pneumonia.
- If inhaled - Remove victim to fresh air. Apply artificial respiration if indicated.
- If on skin - Remove contaminated clothing and wash affected areas with soap and water.
- If in eyes - Flush eyes with plenty of water. Get medical attention immediately.

2. In the precautionary statements, under the subheading hazards to humans & Domestic Animals, remove the parenthesis from "to Domestic Animals." Also, delete the word "CAUTION" which appears as the first word in the paragraph.

-2-

3. In the Precautionary Statements, under the subheading Environmental Hazards, delete the following sentences which may appear:

- o Birds feeding on treated areas may be killed.
- o Birds and other wildlife in treated areas may be killed.
- o Do not apply where runoff is likely to occur.
- o Do not apply when weather favors drift from treated areas.

Also, remove the quotation marks (") from this section and delete the last sentence which reads: "Apply this .... this label."

4. In the Precautionary Statements, under the subheading Physical Or Chemical hazards, remove the quotation marks (") from the subheading. Also, remove the quotation marks (") from the rest of this section.

5. Delete the heading "Directions For Use," which follows the Misuse Statement. (The heading preceding the Misuse Statement is sufficient.) Remove the quotation marks from the misuse statement.

6. Delete "Storage and Disposal Statement" from the disposal section as it is unnecessary.

Sincerely yours,

George T. LaRocca
