DIRECTIONS FOR USE:

CLEAR POOL NF is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using **CLEAR POOL NF**.

For pools having just visible algae growth add an initial dose of 37 to 57 fl. oz. of **CLEAR POOL NF** per 10,000 gal. of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 20 to 37 fl. oz. of **CLEAR POOL NF** per 10,000 gal. of water.

To maintain pools free of visible algae growth, subsequent additions of 7 to 14 fl. oz. of **CLEAR POOL NF** per 10,000 gal. of water should be made every 5 to 7 days after the initial treatment.

Uniform distribution of **CLEAR POOL NF** throughout the water in the pool is necessary for maximum effectiveness.

CLEAR POOL NF is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. **CLEAR POOL NF** can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix **CLEAR POOL NF** with concentrated dry or liquid chlorine products.

ACTIVE INGREDIENTS:

Poly [oxyethylene (dimethyliminio) ethylene-	
(dimethyliminio) ethylene dichloride]	20.0 percent
Inert Ingredient	80.0 percent

CAUTION: KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.

Rinse empty container thoroughly with water and discard container. This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.
