HEDDY SUPER PLANT SPRAY

- Grows larger plants
- Bigger flowers
- Earlier blooms

CAUTION: Combustible Mixture. Keep away from heat or flames. KEEP OUT OF REACH OF CHILDREN. See precautions on back panel.

Net Weight: 5 ounces

Stock No. 606

Back Panel - 1

U.S.D. A. Registration No. 4990-X

HEDDY SUPER PLANT SPRAY is a blend of Gibberelic Acid which produces a remarkable change in plant growth.

FOLLOW DIRECTIONS CAREFULLY AND READ ENTIRE LABEL THOROUGHLY BEFORE USING.

DIRECTIONS:

1. Hold can up-right 10 to 12 inches from plant or foliage to be sprayed
2. Apply in two or three short bursts.
3. Do not drench plants.

HEDDY SUPER PLANT SPRAY is highly concentrated and very small amounts are needed to produce results. Young growing parts are most responsive. With increase growth extra water and fertilizer may be required. Concentrate on plants beginning to bud for improved flowering. Watch the new growth and treat until desired results are obtained. Repeated spraying should be adjusted to response of plant and desired results.

CAUTION: As the need disappears, growth response will be less. If new growth is pale or spindly, or undesirable elongation results, you may be over-stimulating the plant. Reduce general application and concentrate on improving the bloom. Thus, the possibility of over growth is avoided and the flower plants will be given the added stimulation they can use to good advantage.

CAUTION: Contents under pressure. Exposure to prolonged sunlight or other source of heat may cause can to burst. DO NOT STORE ABOVE 120°F. DO NOT PUNCTURE OR INCINERATE CAN. KEEP OUT OF REACH OF CHILDREN.

CONTENTS

ACTIVE INGREDIENTS: Potassium Gibberellate 0.005%  
 INERT INGREDIENTS 99.995%

Sold by: HEDDY CORPORATION, Paterson, New Jersey

CONSISTENT TREATMENT OF YOUNG PLANTS PRODUCES EARLIER, LONGER LASTING BLOOMS from plants with usually "rosette" for a season or those that wait for long days of summer, or shorter days in the fall. Typical examples are:

Yucca	Daisies	Larkspur	Dahlia
(Carpet Bugle)	(Shasta)	Petunias	Pansies
China Aster	English &	Foxgloves	Stocks
Chrysanthemum	Transvaal)		

GET MORE PROFUSE FLOWERING from plants which normally produce flowers one after another, such as African Violets, Jerusalem, Cyclamens, Oxalis.

GET LARGER FLOWERS BY spraying when buds begin to form from plants that have long lasting or slow developing blooms like Geraniums, Hydrangeas.

GIVES YOUR ROSES LONGER FLOWER STEMS. GET INCREASED SIZE, HEIGHT LEAF AREA BY periodic treatment of many foliage plants like

Geranium	Forsythia	Maranta	Tradescantia
Aglaomena	Fuschia	Rhoeo	(Wander Jew)
Coleus	Holly	Yucca	Graptopetalum
Crassula	Ivy	Zebrina	Germander
Dracaena	Jasmine	Sedum	Pelhanthus
Fatshedera	Tobacco	Tolmia	Peperomia

Not all plants are similarly affected by HEDDY SUPER PLANT SPRAY. Many factors combine to result in plant growth. Some plants may not respond, some may respond differently, or some may respond to high concentration, but not with normal growth. Some such plants are:

Boxwood	Iris	Lilies	Gladioli	Firs
Spruce	(Except	Ferns	Tulips	Pine
Junipers	Japanese)	Palms	Poppies
