DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

X-CIDE 102 is especially recommended for controlling sulfate reducing bacteria in water to be used for polymer treated waterflood programs. X-CIDE 102 does not interfere with the viscosity characteristics of the polymer.

X-CIDE 102 may be applied in systems used to treat injection water immediately ahead of water deaerating equipment such as the WEMCO[®] Deaerators, the clear water holding tank, or at the suction side of the injection pumps.

X-CIDE 102 should be used full strength in concentrations of 30 ppm of X-CIDE 102 on a continuous basis or in slug applications to 500 ppm of X-CIDE 102 (1/4 pint per 1000 gallons equals approximately 30 ppm). A typical application is one pint per 1000 gallons.

STORAGE AND DISPOSAL

STORAGE: Do not contaminate water, food or feed by storage or disposal. Do not use, pour, spill or store near heat or open flame.

PESTICIDE DISPOSAL: Pesticide wastes are hazardous. Improper disposal of excess biocide or rinse is a violation of Federal Law. If these wastes are not to be disposed of by use according to label instructions, contact your local Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling, or conditioning, or puncture and dispose of in a sanitary landfill, or by procedures approved by state and local authorities.
