NAME OF PESTICIDE PRODUCT

X-- to 137 Industrial Back inde

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Petrolite Corporation Tretolite Division 369 Marshall Avenue St. Louis, M. 63119

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregs ered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indoraement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product order this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFR; 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregion of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

If these conditions are not complied with, the registration will subject to cancellation in accordance with FIFE sec. 6(e). Your release to shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Formaldehyde:

Inert Ingredients:

X-CIDE 137 industrial bactericide will control bacteria found in waters associated with petroleum production. control Ιt will bacteria in water which collects in tank bottoms, in water for water flooding operations, and in gas transmission and storage systems.

This product especially is recommended for controlling sulfate reducing bacteria in water to be used for polymer treated waterflood programs. It does not interfere with the viscosity characteristics of the polymer agent.

APPLICATION

X-CIDE 137 industrial bactericide may be applied in systems used to treat injection water immediately ahead of water deciling equipment such as the dissolved air flotation unit, in the clear water holding tank, or at the suction side of the injection pump.

X-CIDE 137 industrial bactericide should be used full strength in concentrations of 200 - 5,000 ppm of active on a continuous basis or in slug applications.

wildlife. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES permit. For quidance contact your Regional Ofice of the EPA.
