

CAMEL CHEMICALS

Camel Food Protectant
Formula F-7

(USDA Reg. No. 5011-42)

ACCEPTED
FEB 13 1967
UNDER THE FEDERAL FOOD, DRUG, AND COSMETIC ACT
FOR EQUILY AND RESIDUALLY TOLERATED UNDER NO. 5011-42 REFERRED TO ATTACHED LABELS

Contains Pyrethrins, Piperonyl Butoxide, and Tabatrex Insect Repellent.
Kills and Repels Roaches and Flies. Also kills Ants, Mosquitoes, Gnats,
Silverfish, Crickets, and Spiders. Odorless, non-irritating, free of greasy
deposit, and non-toxic when used according to directions. Recommended for
use in Carbonated Beverage Bottling Plants, Breweries, Dairies, Pickle Plants,
and Canneries.

ACTIVE INGREDIENTS:

100%

Pyrethrins	.20%
Piperonyl Butoxide, technical**	.25%
Di-n-butyl succinate*	1.00%
Petroleum Distillate	98.55%
	<u>100.00%</u>

* Tabatrex. Trademark

** equivalent to 0.20% of (butylcarbityl) (6-propylpiperonyl) Ether,
and to 0.05% of related compounds.

CAUTION

KEEP OUT OF REACH OF CHILDREN

See side panel for additional cautions.

DIRECTIONS

DIRECT CONTACT SPRAYING: For killing and residually repelling Roaches:

Apply to the point of run-off on all baseboards, in all cracks and crevices, in
conveyors, electric switch boxes, and in the receiving end of Soakers or
bottle washers. Include spraying under syrupe, filler, capper, mixer and
any other equipment where Roaches and Waterbugs travel. When applied to
the point of run-off, an effective residual barrier against re-infestation
by Roaches is established. Repeat treatment when necessary.

For Empty Bottle Cases: Apply to the point of run-off inside and outside
of empty cases with an efficient hand sprayer, powder sprayer, or automatic

RECEIVED
2-13-62

case-treating machine to produce a residual barrier against re-infestation by roaches during transit. Repeat treatments as necessary.

Vending and Dispensing machines: Remove Bottled Beverages, and spray to the point of run-off inside and under dispenser where Roaches and Waterbugs travel. Refill and close. Repeat treatment when necessary.

Delivery Trucks: Apply to the point of run-off throughout delivery truck structures as often as necessary.

For Residually Repelling Flies: Apply to the point of run-off on surfaces where flies congregate, repeating treatments as necessary.

For Killing Ants: Spray Ants, Ant-trails, areas around door sills and window frames where the pests enter the premises. Repeat as often as necessary.

Spiders, House Centipedes, and Crickets: Spray thoroughly and repeat spraying of infested areas, working a wet spray into cracks and other hiding places, directing Formula F-7 to hit the pests wherever possible. Repeat applications if necessary.

TO USE AS A SPACE SPRAY: After closing off all air currents, direct spray upward at walls and ceilings so that as many insects as possible can be contacted with a direct vapor or mist. Applications can be made with Carmel Fogging Sprayers, Electric sprayers, or Compressed-air sprayers.

To kill accessible crawling insects such as Roaches, Waterbugs, and Silverfish, dispense 1 quart Carmel Formula F-7 per 10,000 cubic feet of space. Dispense 1 pint per 10,000 cubic feet of space to kill flying insects such as Flies, Gnats, and Mosquitoes. Doors and windows should be closed for at least 10 minutes after spraying; then sweep up and destroy all dead and dying insects. Repeat when necessary. Use space-spraying equipment in empty returned bottle-case storage rooms, washrooms, locker rooms, bottling room, and other storage rooms at least once a week, or as often as necessary.

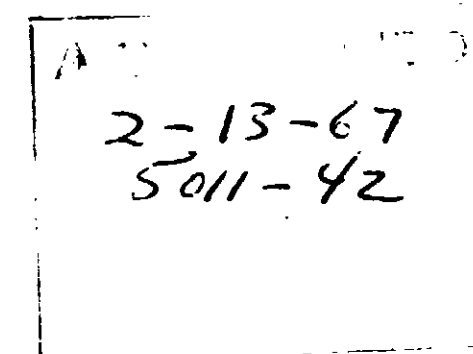

CAUTION

Do not apply directly to food products, avoid pouring, spraying or storing near Fire or Flame. Harmful if swallowed. Keep away from children.

NON-WARRANTY

Seller makes no warranty of any kind, expressed or implied, concerning the use of this product. Buyer assumes all risk of use of handling whether in accordance with directions or not.
