CHEMICALS

MANUFACTURED BY

Carmel Chemical Company

1000 WEST 10TH AVENUE, DENVER, COLORADO 80202

DURABLE

Length of exposure time is 1 1/2 hours. House should be well ventilated—at least.

FOG

Flush the insecticide tank of the Carmel from the formulation may remain in the causing reduced fog output and poor answer to this problem.

TO FLUSH:

1. Drain insecticide tank. (To avoid insecticide and use it all in the tank.)
2. Pour at least 8 ounces of Carmel if flushing solution is not available.
3. Replace tank cap and rock applicator.
4. Start machine (outside the greenhouse).
5. Loosen insecticide tank cap to re-ventilate.
6. Remove chemical filter and rinse.

After flushing the Carmel Fog Applicator with special cleanout rod.

Antidote: If swallowed, give a tablespoon of fluid. Have victim lie down and keep warm.
Warning: Poisonous by skin contact, inhalation. Wash skin, wash immediately with soap and water. Remove clothing and flush skin or eyes with plenty of water. Do not breathe fog or spray before eating or smoking; wear clean clothes. Always wear a gas mask of a type approved for Naled Insecticide Protection. Keep out of water. This product is toxic to fish. Keep out of water on this label.

Seller makes no warranty other than specifically stated. Seller is not responsible or liable for injury to crop, person, or handling of the product. Please use in accordance with label directions.

IMPORTANT

If subjected to temperatures below 32°F, warm to room temperature and thoroughly mix before use.
