OFFICE OF
PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

Subject: Label Amendment Submission of 05/10/94 Response to PR Notice 93-7
EPA Reg. No. 5011-60
FORMULA GH-18

Dear Registrant:

The labeling cited above and submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is accepted subject to the comments reflected on the enclosed sheet. A copy of your proposed labeling stamped "ACCEPTED WITH COMMENTS" is enclosed.

WHAT THIS ACCEPTANCE MEANS:

Based on your certification, the Agency has accepted the labeling changes that are necessary to comply with the Worker Protection Standard (WPS) labeling requirements of 40 CFR part 156, subpart K, described in PR Notices 93-7 and 93-11. Any other labeling changes submitted in connection with this amendment application but not directly related to compliance with the WPS have not been reviewed or accepted by the Agency. If you wish to make such changes, you must submit a separate amendment application proposing them. If your product is currently suspended, the acceptance of this labeling amendment does not affect the suspension in any way.

WHAT YOU NEED TO DO NEXT:

By the next label printing make all the specified changes to your labeling. Send to EPA one (1) copy of the final printed labeling:

- BEFORE selling or distributing any product bearing the final printed labeling
- AND
- WITHIN one year from date of this acceptance.

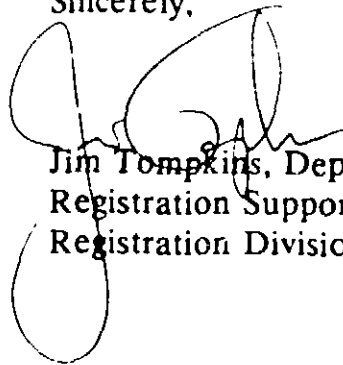

Submit the final printed labeling via the U.S. Postal Service to:

Document Processing Desk (FIN-LABEL)
Office of Pesticide Programs (7505C)
U.S. Environmental Protection Agency
401 M Street, SW
Washington, D.C. 20460-0001

Hand or courier deliveries of final printed labeling may be made to:

Document Processing Desk (FIN-LABEL)
Office of Pesticide Programs
Room 266A, Crystal Mall 2
1921 Jefferson Davis Highway
Arlington, VA 22202

Sincerely,

Jim Tompkins, Deputy Chief
Registration Support Branch
Registration Division (7505W)

FORMULA GH-18

ORGANOPHOSPHATE

ACTIVE INGREDIENTS:
 Naled—1,2-Dibromo-2,2 dichloroethyl dimethyl phosphate 10.00%
 *Inert Ingredients 90.00%
 TOTAL 100.00%

*Contains petroleum distillates

THIS PRODUCT CONTAINS 0.75 LBS NALED PER GALLON

KEEP OUT OF REACH OF CHILDREN

WARNING AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

STATEMENT OF PRACTICAL TREATMENT
Organophosphate

IF SWALLOWED, drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention. Have victim lie down and keep quiet. Call a physician immediately! ANTIDOTES: Atropine is antidotal. 2-PAM is also antidotal and may be administered in conjunction with Atropine.

IF INHALED, seek medical attention.

IF ON SKIN, remove contaminated clothing and wash with soap and water for at least 15 minutes.

IF IN EYES, flush with water for at least 15 minutes. Get medical attention.

WARNING:

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS (& DOMESTIC ANIMALS)**

Precautionary Statements:

DANGER: Poisonous by skin contact, inhalation or swallowing! Rapidly absorbed through skin! If on skin, wash immediately with soap and water. Do not get in eyes, on skin or on clothing. Avoid contact with skin at all times. In case of contact flush skin or eyes with plenty of water for at least 15 minutes. For eyes, get medical attention. Do not breathe fog or spray mist. Keep out of reach of children.

Personal Protective Equipment:

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category E on an EPA chemical resistance category selection chart.

Applicators and other handlers must wear:

- A. Coveralls over long-sleeved shirt and long pants.
- B. Chemical resistant gloves, such as Nitrile rubber ≥ 14 mils or Barrier laminate ≥ 14 mils or Neoprene rubber ≥ 14 mils or Viton ≥ 14 mils
- C. Chemical-resistant footwear plus socks.
- D. Protective eyewear.
- E. Chemical-resistant headgear for overhead exposure.
- F. Chemical-resistant apron when cleaning equipment, mixing, or loading.
- G. A respirator with either an organic vapor-removing cartridge with prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-23C). 146

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrates. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations:

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is highly toxic to bees exposed to direct treatment or residue on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service. GH-19 is also toxic to fish, shrimp, crayfish, crabs and other aquatic invertebrates. Keep out of lakes, streams and ponds.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near open flame or heat

STORAGE AND DISPOSAL

Prohibitions: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. **Pesticide Storage:** Do not store with food, feed, drugs or clothing. Store securely to prevent cross contamination of other pesticides and fertilizer. Store in original, tightly closed container. Store above 35°F. **Pesticide Disposal:** Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance. **Container Disposal:** Plastic-Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of the smoke. Metal: Triple rinse (or equivalent), then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedure approved by state and local authorities. If subjected to temperatures below 32°F., move container to warm storage until reaching average room temperature and thoroughly mix before use.

RIGHT

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

15
3
5

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

CAS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- A. Coveralls over long-sleeved shirt and long pants.
- B. Chemical resistant gloves, such as Nitrile rubber ≥ 14 mils or Viton ≥ 14 mils, or Neoprene rubber ≥ 14 mils or Barrier laminate ≥ 14 mils
- C. Chemical-resistant footwear plus socks.
- D. Protective eyewear.
- E. Chemical-resistant headgear for overhead exposure.

Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas.

When applied as an aerosol with the Dyna-Fog® Applicator, Formula GH-18 is recommended for the suppression of serious infestations on ornamentals of Red Spider Mites and Mealybugs, and for the control of Aphids, Whiteflies and Thrips on Roses (except White Butterfly variety). Chrysanthemums (except Shasta variety). Carnations, Snapdragons and Poinsettias.

PREPARATION PRIOR TO FOGGING: (1) Close all doors, windows and ventilators. (2) Lock or barricade all entrances, ~~post warning signs~~. Take precautions to prevent ~~persons~~ and animals from entering the area. (3) Turn off all misting systems. Be certain all blossoms and foliage are dry. Turn off all sulphur vaporizers 24 hours prior to fogging. (4) Room temperature should read from 70 to 85°F for best insect kill.

~~Wear a full face gas mask pesticide canister jointly approved by the Mine Safety and Health Administration (MSHA) and the National Institute for Occupational Safety and Health (NIOSH) for pesticide application under provisions of 30 CFR Part II~~

RE-ENTRY STATEMENT

1 1/2

DURATION OF EXPOSURE: The length of time for exposure in greenhouses is 1 1/2 hours. After the exposure time, the greenhouse should be well ventilated, ~~before re-entering~~.

ORNAMENTALS: (1) Calculate in cubic feet the greenhouse space to be treated. For most greenhouse ornamentals—1 ounce of GH-18 will treat 3,000 cu. ft. of space. 16 ounces will treat 50,000 cu. ft., and 32 ounces will treat 100,000 cu. ft. (2) Pour into the Dyna-Fog® Applicator insecticide tank the required number of ounces of Formula GH-18 to treat the calculated space. (3) Open the metering valve on the fog applicator counterclockwise to the No. 4 setting on the dial. Eight ounces of liquid will be fogged per minute with a mass median diameter size of 5 microns. (4) Start the pulsating jet engine of the fog applicator and allow it to run for one full minute before opening the insecticide valve. (5) Walk backward down the entire length of the center aisle of the greenhouse, directing the fog under benches, swaying the machine back and forth to blanket two benches from each side of the aisle. Keep the fog applicator nozzle at a minimum of 4 ft. from plants. The Dyna-Fog® Applicator should never be in a fixed position—it is to be constantly moving so as to cover the entire area as evenly as possible. Do not over-apply to the point where foliage is visibly wet. For ground beds, walk backward down the center aisle, directing the fog applicator nozzle at a 30° angle downward so that the fog hits the ground. Repeat applications as often as necessary.
