DIRECTIONS

TO USE AS A FOGGING INSECTICIDE

FOGGING APPLICATION INDOORS: In food processing plants, dairies, restaurants, industrial plants, granaries, theaters, warehouses, horse stables, kennels and barns for Flies, Mosquitoes, Wasps, Gnats and other small flying insects. After closing off all air currents, direct fog upward at walls and ceilings so that as many insects as possible can be contacted with a direct vapor or fog. Application is to be made with the CCC-167 Automatic Electric Fogger. Use one ounce of Carmel Formula AE-3 per 1,000 cubic feet of space for flying insects. Doors and windows should be closed for at least 1 hour after fogging; then sweep up and destroy all dead and dying insects. Repeat when necessary. For Roaches, Water-Bugs, Crickets, Ants and similar crawling insects, use one ounce of Carmel Formula AE-3 per 500 cubic feet of space. Doors and windows should be closed for at least 1 hour after fogging. Repeat when necessary.

FOGGING APPLICATION OUTDOORS: Adult Mosquitoes, Flies and Gnats - Envelop total area to be treated with a fog. Pay particular attention to all zones of stagnation, ponds, rubbish piles, etc.

CAUTION

Harmful if swallowed. Keep away from children. Avoid breathing fog or spray mist. Remove pets, birds and fish bowls before applying. Do not contaminate food, feed, milk, milk handling equipment or drinking water. Avoid pouring, spraying, or storing near fire or flame; turn off all pilot lights. Do not reuse container. Destroy when empty. Use this product as a fogging insecticide in food processing plants only when plant is not in operation. Foods should be
