

[5011-103]

DIRECTIONS

TO USE AS A FOGGING INSECTICIDE

After closing off all air currents, direct fog upward at walls and ceilings so that as many insects as possible can be contacted with a direct vapor or fog. Application is to be made with the Dyna-Fog Insecticide Applicator. To kill accessible crawling insects such as Flour and Grain Beetles, Silverfish, Roaches, and Crickets, dispense 1 quart Carmel Food Plant Fogging Insecticide per 10,000 cubic feet of space. Disperse 1 pint per 10,000 cubic feet of space to kill flying insects such as Flies, Mosquitoes, adult Male Moths, Gnats and Midges. Door and windows should be closed for at least 1 hour after fogging to allow product to destroy all dead and dying insects. Repeat when necessary.

DIRECT CONTACT SPRAYING

To kill Roaches, Silverfish, Crickets, and Water Bugs on premises, direct a wet mist toward infested areas, floors and services to kill the insects. Adjust the volume control on the Dyna-Fog Insecticide Applicator for heavy output and thorough application should be made, repeating treatments as often as necessary for Flour and Grain Beetles, and Moths, Grain and Rice Weevils, after clearing out bins, elevators, and all machinery. Apply Carmel Food Plant Fogging Insecticide with the Dyna-Fog Insecticide Applicator adjusted for heavy output to deliver medium size droplets. Repeated treatment is recommended whenever infestation occurs.

ANTS

Apply Ants Anticide to cracks, crevices, and window frames where the ants enter the premises. Repeat as often as necessary.

CARMEL FOOD PROTECTANT FORMULA F-104

USDA Reg. 5011-103

Contains Pyrethrins, Rotenone, and Knockdown Agent. Especially Recommended for Use in the Dyna-Fog Insecticide Applicator, Electric and Compressed Air Sprayers.

CARMEL

ACTIVE INGREDIENTS 100%

Rotenone	0.1
Pyrethrins	0.2
Other Inert Ingredients	2.0
Estimate of active ingredients	2.5
Amount of active ingredients	95.2
Total	100

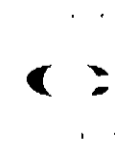

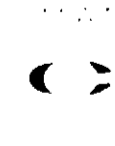

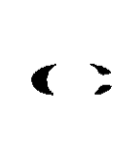

ETHICAL

CAUTION

KEEP OUT OF REACH OF CHILDREN

CHEMICALS
