

[5011-128]

An insecticide for use in Baking Companies, Bottling Plants, Breweries, Candy Factories, Canneries, Dairies, Flour Mills, Horse Stables, Hospital Maintenance Areas, Kennels, Nut Processing Companies, Rice Mills, Seed Houses and Restaurants. See caution limitations.

For fogging control of flies, mosquitoes, and gnats and direct contact spraying control of roaches, ants, spiders, water bugs and house centipeds.

Recommended for use in fogging applicator and can also be applied by electric and power and hand operated sprayers.

DIRECTIONS

Fogging Application Indoors For Control of Flies, Mosquitoes and Gnats: Fogger should be directed toward ceiling and walls and ceiling should be sprayed as far as possible. Gnats can be controlled with a direct fog. When application is made in a room, the applicator use one ounce of Carmel Formula F-500 per 1,000 cubic feet of space. Rooms should be closed for at least 10 minutes after fogging. Sweep up and discard dead flies and dying insects. Repeat when necessary.

Direct Contact Spray Application For Control of Roaches, Ants, Spiders, Water Bugs and House Centipeds: Direct a wet spray toward infested areas, floors, cracks and crevices to hit the insects. Apply Carmel Formula F-500 with an efficient electric or other power or hand operated sprayer that will deliver medium size droplets. Thorough application should be made with repeated treatment whenever reinfestation occurs.
