King Spray

ROACH AND INSECT KILLER

This product may be used in any part of the home. Before using, be sure that all food and cooking utensils are protected from the spray.

DIRECTIONS

Close all windows and doors.

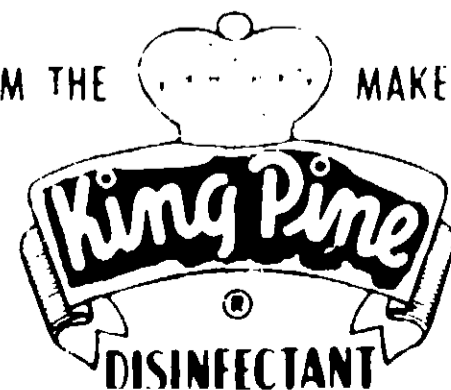

To operate: Automatic continuous spray is to kill flying insects. Aim spray away from yourself, push down the button, hook on and leave room. For ordinary spraying. Aim spray opening away from person. Hold dispenser at least 3 feet from all objects. Push button to spray.

To kill flies, mosquitoes, gnats, wasps, hornets and flying moths both methods of spraying are effective. Spray 5 to 10 seconds for average room (1000 cubic feet). Keep room closed for 15 minutes after spraying.

To kill roaches, ants, waterbugs, silverfish, crickets, scorpions, spiders and centipedes. Spray baseboards, cracks, crevices, moist areas and openings around sinks and pipes and other hiding places, hitting the insects directly, when possible. Spray ant hills and ant trails over window and door sills and other locations. Repeat as necessary. To kill bedbugs. Remove bedding, and spray mattress seams and folds from 3 feet. Spray all parts of bed and other hiding places in room. Repeat as required.

To kill fleas. Spray sleeping quarters of pets, and treat floors, baseboards, floor covering and wall cracks. Repeat as required.
