DEEP PURPLE ALGAEICIDE BRIQUETTES are effective for destroying algae and organic matter in cooling towers, evaporative condensers and air wash water systems. The purple color precludes its use in reflective ponds, fountains, or swimming pools.

DEEP
PURPLE
ALGAEICIDE
BRIQUETTES

mended since the active ingredient is "used up" in the process of destroying the algae and organic matter.

b) PREVENTIVE MAINTENANCE:

Periodic application of smaller dosages will assist

The purple color imparted to the water by DEEP PURPLE ALGAEICIDE BRIQUETTES indicates that the solution is active. This color should last at least 20 minutes. If the purple color fades before 20 minutes of circulation, additional briquettes should be added to maintain this color during the treatment period.

ALGAE
IN

2) Drop briquettes into pan near intake.

3) Operate tower in normal manner, inspecting screens and nozzles occasionally to prevent clogging.

4) When system is clean, drain sump, wash dead algae from slats and sump, flush, and refill with
