

PANTHER 611 COOLING TOWER ALGAEICIDE-SLIMICIDE

Active Ingredient

n-Alkyl (50% C₁₄, 40% C₁₆, 10% C₁₈) dimethyl benzyl ammonium chloride

100%

Inert Ingredients

00%

PANTHER 611 Cooling Tower Algaecide-Slimicide controls algae and slimy growths on wetted surfaces and in the recirculating water in cooling towers. The growth of algae and slimy growths in the recirculating water seriously reduce the efficiency of the entire cooling system. This situation can be avoided by the proper use of PANTHER 611 Algaecide-Slimicide.

USE DIRECTIONS

Cooling Towers

Apply PANTHER 611 Algaecide-Slimicide to the recirculating water in cooling towers at a rate of 100 to 200 ppm. The product will control algae and slimy growths on wetted surfaces and in the recirculating water. The product will also control the growth of algae and slimy growths in the recirculating water.

Prevention of Algae

Apply PANTHER 611 Algaecide-Slimicide to the recirculating water in cooling towers at a rate of 100 to 200 ppm. The product will control algae and slimy growths on wetted surfaces and in the recirculating water. The product will also control the growth of algae and slimy growths in the recirculating water.

Towers Without Continuous Feed Equipment

Apply PANTHER 611 Algaecide-Slimicide to the recirculating water in cooling towers at a rate of 100 to 200 ppm. The product will control algae and slimy growths on wetted surfaces and in the recirculating water. The product will also control the growth of algae and slimy growths in the recirculating water.
