INSTRUCTIONS

MECHANICAL EGG WASHER

1. Wash eggs in the machine with clean water. Wash the eggs in the machine for 15 minutes, adding 3 oz. of Formula A-5 to the water.

2. Rinse the eggs with clean water. Add 3 oz. of Formula A-5 to the water for 15 minutes and rinse thoroughly.

Use 1 oz. per 5 gallons of water.

Disregard a slight oil film at start of washing. This special ingredient has a beneficial effect.

Do not wash over 10 dozen eggs per gallon of solution. If solution is soiled or detergent deteriorates, change the solution.

Clean the machine after each use.

Follow the instructions furnished by the manufacturer of your machine.

MANUAL OR "DUNK" WASHING

WASHING

1. Be certain the water is warmer than the eggs. 105 to 120 degrees is suitable. Use the same amount of solution for machine washing.

Avoid rinsing by using clean solution.
