DE VERE CHEMICAL COMPANY, INC. • JANESVILLE, WISCONSIN

**CONTROL DISINFECTANT** meets health regulations when used as directed. Use quantity of **CONTROL** recommended by local health department to give desired results. Where no facilities are available to test chlorine reduction of use solution to less than 50 ppm available chlorine, a starting solution of 200 ppm should be employed.

1. Scrape and prewash utensils and glasses whenever possible.
2. Wash with **DE VERE LIME SOLVENT**.
3. Rinse with clean water.
4. Sanitize in a solution of 1/2 oz. **CONTROL** to three gallons of water (200 ppm). Immerse all utensils for at least two minutes, or for contact time specified by governing sanitary code.
5. Place sanitized utensils on a rack or drainboard to air dry.

**DIRECTIONS FOR USE**

<b>1st TANK</b> <b>WASH</b> 1 oz. <b>LIME SOLVENT</b> to 4 gal. water	<b>2nd TANK</b>  <b>RINSE</b>  Clear water	<b>3rd TANK</b> <b>DISINFECT</b> Required amount of <b>CONTROL</b> disinfectant
--	--	--

1/4 oz. or one rounded teaspoon **CONTROL** to three gallons of water provides 100 ppm available chlorine.

1/12 oz. **CONTROL** per gallon of water provides 100 ppm avl. chlorine.

1/6 oz. **CONTROL** per gallon of water provides 200 ppm avl. chlorine.

If two tanks are used, use directions for the first and third tanks. Immerse glasses in disinfectant solution for the period of time required by health department. Remove and air dry. **CAUTION: DO NOT TOWEL DISINFECTED GLASSES OR OTHER ARTICLES. AVOID CONTAMINATION OF FEED AND FOODSTUFFS.**

Approved under the regulations of the Wisconsin State Board of Health.
