DIRECTIONS FOR USE

NOTE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

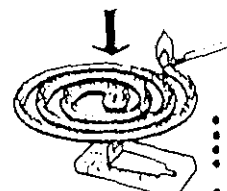

For best results—place one coil about every 8-10 feet around perimeter of area to be protected. Most effective in semi-confined outdoor sites such as porches or patios. Results and duration are effected by airflow and breeze. Save the stands for use with additional coils.

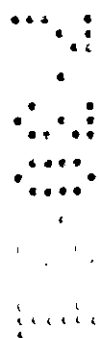

Gently flex and separate interlocked coils.

Bend tab straight up.

Insert tab firmly into coil slot, ignite coil then blow out flame.
