The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 and 2008-1 dated for May 21, 2010, 2010 for:

**EPA Registration Number: 5178-10      Kilmos PF Mosquito Repellent Sticks**

The Registration Division (RD) has conducted a review of this request for applicability Under PRN 2007-4 and finds that the label change(s) requested falls within the scope of PRN-2007-4. The label has been date-stamped "Notification" and will be placed in our records.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For outdoor use only. Cover exposed food to avoid contamination. Do not allow burning sticks to contact flammable objects, materials or surfaces.

Remove a stick from the box and ignite the tip until it flames. Invert the stick to ensure the entire end is well started. When this occurs, blow out the flame. It will continue to burn without a flame but will create smoke which will repel mosquitoes. Insert the bottom end of the stick into the ground or a bucket of sand making sure the stick stands upright.

Place sticks approximately every 10 to 12 feet apart around the perimeter of the area to be protected. Sticks will be most effective when there is little or no breeze. Depending on air movement sticks will last 3-4 hours. If a crack appears in the body of the stick it is simply drying. This is normal and in no way impedes effectiveness.

To extinguish, gently knock off glowing end and put the tip out by inserting in dirt or sand.
