

BIO-FIVE
SANITIZING DETERGENT

ACTIVE INGREDIENTS:

Sodium carbonate	50.0%
Sodium metasilicate, pentahydrate	15.0%
Trisodium phosphate	15.0%
Alkyl (C ₁₂ 70%; C ₁₄ 30%) dimethyl benzyl ammonium chloride	2.5%
Total Active Ingredients	82.5%

INERT INGREDIENTS:

17.5%
100.0%

This product is used for the cleaning and sanitization of equipment associated with food processing. Sanitization of equipment, containers, implements and storage bins reduces food spoilage and aids in preservation of natural flavors through inhibiting the growth of many bacteria, mold and slime forming organisms.

DIRECTIONS: For average cleaning and sanitizing, use one ounce Bio-Five per gallon of water. For cleaning heavy soil use up to four ounces Bio-Five per gallon of water. Hot water improves both cleaning and sanitizing properties. All equipment must be rinsed with clear water before reuse or before coming in contact with food or food products.

FOR MOLD CONTROL ON WALLS, CEILINGS, ETC.: Clean thoroughly, rinse and then spray or sponge with a solution of four ounces per gallon of water of BIO-FIVE.

CAUTION! KEEP OUT OF THE REACH OF CHILDREN 14 POINT

Avoid contact with food or food products. Avoid contact with skin or eyes. In case of contact, wash thoroughly with water. If irritation persists, get medical attention. Harmful if swallowed. Wash thoroughly after handling.

Do not mix with soap as this will neutralize sanitizing efficiency.
