BIO-SEC 153

INDUSTRIAL INSECTICIDE

FOR THE CONTROL OF FLIES AND MANY OTHER COMMON
INSECT PESTS IN INDUSTRY

Bio-Sec 153 Industrial Insecticide is an effective insecticide for rapid control of flies and many other common insect pests found in industry. It can be used around food, food products and utensils, according to direction, but should not be applied directly to uncovered food or foodstuffs.

ACTIVE INGREDIENTS:

Permethrin 100%
Pyrethrin 99.471%
Piperonyl butoxide 0.451%
Fenitrothion 0.048%

100%

99.471%

0.451%

0.048%

**Equivalent to 0.006% of (insecticide) (6-propylpiperonyl) ether, and to 0.006% of related compounds.

DIRECTIONS

Bio-Sec 153 Industrial Insecticide kills on contact the exposed stages of flies, mosquitoes, gnats, silverfish, crickets, spiders, scorpions, wasps, hornets, flying moths, boxelder bugs, clover mites and ants.

For best results, use in a good spray or atomizer adjusted to deliver a fine mist. For control of flies, mosquitoes and gnats, the area should be closed up and filled with mist. Whenever possible, the space should be left closed for at least 10 minutes after treatment. Treat infested areas thoroughly and repeat applications as needed.

In the control of flying insects, direct the spray toward the upper portions of the enclosure and fill the atmosphere with mist, using 2 to 3 ounces to each 1000 cubic feet of space. Against running and crawling pests treat all areas where these insects are commonly found, and direct the liquid behind baseboards, mouldings, equipment, cabinets, shelves, sinks, pipes, toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places.

CAUTION: KEEP OUT OF THE REACH OF CHILDREN. Harmful if swallowed. This insecticide is an oil base material and should not be stored, sprayed or otherwise exposed toward or near an open flame.

Use the product as a space spray in Food Processing Plants only when plant is not in operation. Food should be removed or covered during treatment. All food processing surfaces should be removed during treatment and thoroughly cleaned before using.
