## BIO-GUARD SWIMMING POOL ALGICIDE

ACTIVE INGREDIENTS: Alkyl 158% C14, 28% C16, 14% C12) dimethyl benzyl ammonium chloride . 10% INERT INGREDIENTS: 90%

BIO-GUARD SWIMMING POOL ALGICIDE is formulated to complement swimming pool water being treated with normal chlorine systems. It is especially effective against growth of algae and being non-volatile, aids in maintaining pool water clarity and sparkle. The residual effectiveness of BIO-GUARD SWIMMING POOL ALGICIDE tends to stabilize the total chemical treatment system.

BIO-GUARD SWIMMING POOL ALGICIDE is compatible with all chemicals normally used in swimming pool maintenance, however, in its concentrated form this chemical should not come into contact with "igh concentrations of chlorine DO NOT MIX BIO-GUARD SWIMMING POOL ALGICIDE AND CHLORINE TOGETH when adding to the pool. These chemicals should be handled separately.

BIO-GUARD SWIMMING POOL ALGICIDE is economical, efficient, stable. It is non-corrosive and non-staining in use dilution.

## DIRECTIONS

TO DETERMINE POOL CAPACITY

RECTANGULAR POOLS - Length times width times average depth (in feet) times 7.5 equals gallons.

ROUND AND OVAL POOLS - Average diameter times average diameter times average depth (in feet) times 5.9 equals gallons.

For an initial application use one gallon BIO-GUARD SWIMMING POOL ALGICIDE per 25,000 gallons of water. Use one quart per 50,000 gallons of water every third to seventh day depending on weather and use factors.

After each rain of consequence, add one quart per 50,000 gallons water. Even though the pool may not be in use for periods of time, algae growth should be controlled since a heavy accumulation of algal growth is difficult to remove. The appropriate amount of BIO-GUARD SWIMMING POOL ALGICIDE should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into several areas of the pool Recirculation or swimming activity will assure rapid dispersion.

CAUTION: Avoid contamination of food. Avoid contact with skin and eyes. In case of contact flush with plenty of water. If irritation persists, get medical attention. Harmful if swallowed.
