

Bio-Guard[®]

ET-70 CHLORINE CONCENTRATE

ACTIVE INGREDIENTS:

Trichloro-s-triazinetrione 77.6%
(Available chlorine 70%)

INERT INGREDIENTS: 22.4%

WARNING

KEEP OUT OF REACH OF CHILDREN
(See back panel for additional precautions)

Manufactured by:

BIO-LAB, INC.
DECATUR, GEORGIA

U.S.D.A. Reg. No. 5185-99

Net Contents: 1/2 lb.

When used as directed, this product is effective as a pool water disinfecting agent.

The filter system should be backwashed or properly cleaned and the pH adjusted between 7.2 and 7.6.

It is recommended that the pool be stabilized with 40-50 ppm trihydroxytriazine to nullify the dissipation effect of sunlight on chlorine. When using this product, both chlorine and trihydroxytriazine are being added to the water; however, it is necessary to initially stabilize pools with 40-50 ppm of trihydroxytriazine to effectively maintain the desired concentration of stabilizer.

DIRECTIONS

The pool should first be superchlorinated so that a chlorine residual of between 1.0 and 2.0 ppm is obtained.

Adjust the rate of water flow through the Clor-Trol Chlorinator so that a constant level of 1.0-1.5 residual chlorine is in the pool water (normally 2-3 ounces of BIO-GUARD ET-70 CHLORINE CONCENTRATE per 10,000 gallons of water daily).

The regular use of a test kit will determine if further adjustments may be necessary to maintain the recommended level of residual chlorine in the pool water.

DANGER: KEEP OUT OF REACH OF CHILDREN. Avoid contact with skin and eyes. Avoid breathing dust. **DO NOT TAKE INTERNALLY!** Harmful if swallowed. Keep cover closed when not in use.

Oxidizing material. Contact with heat, moisture or foreign materials may result in fire. Will burn with the evolution of irritating and hazardous gases. Store in a cool dry place. Keep away from heat or open flames. Do not reuse empty container. Destroy it by burying with waste or burning. Stay away from smoke or fumes.

ANTIDOTE: Call a physician.

External: For skin and eyes, immediately flood with large amounts of water. For eyes, get immediate medical attention.

Internal: Take large amounts of milk, followed by olive oil or cooking oil.
