NOTE: The laws of some states require that sanitizing solution remain in contact with the surface for two minutes. Follow the recommendations of your Health Department.

Always use fresh solution. Change solution when concentration falls below 12½ p.p.m.

5185-207

FOR UDDER WASHING AND SANITIZING

1. Prepare a solution of fresh tepid 25 p.p.m. iodine solution.
2. Place a separate towel for each cow to be milked in above solution.
3. Wash udders and teats, discarding used towel in second bucket.
4. Rinse with warm potable water. Examine each quarter with strip cup.
5. After milking, teats and udders should be rewashed. This will reduce possible contamination from the teat cup and remove any milk residue which could serve as food for bacteria.

FOR MILKING MACHINES, BULK TANKS AND OTHER UTENSILS

1. Flush with tepid water.
2. Scrub with solution containing 1 to 2 oz. to each gallon warm water.
3. Rinse with clean tepid water.
4. Allow to drain dry.
5. Immediately before use, sanitize with 1 oz. to 5 gallons of water, or as recommended by your Health Department.

CAUTION

RED BARN UDDER WASH IS A CONCENTRATED PRODUCT AND SHOULD BE USED IN RECOMMENDED DILUTIONS. AVOID CONTACT WITH SKIN AND EYES. IN CASE OF CONTACT, FLUSH SKIN OR EYES WITH PLENTY OF WATER. FOR EYES GET MEDICAL ATTENTION. AVOID CONTAMINATION OF FOOD. KEEP OUT OF REACH OF CHILDREN.
