

This DISINFECTANT is effective against a wide variety of gram-positive and gram-negative bacteria and pathogenic fungi.

This DISINFECTANT is also an excellent deodorant. Use it to control odors, especially those that are microbial in nature.

This DISINFECTANT mixes readily with water and makes a clear, stable solution. In use dilution, it is non-corrosive and non-staining to porcelain, enameled surfaces, glass, tile, plastics and most common metals.

DANGER

KEEP OUT OF REACH OF CHILDREN. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Protect eyes and skin when handling. Harmful if swallowed. Avoid breathing spray mist. Avoid contamination of food

FIRST AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. If irritation persists, get medical attention. Remove and wash contaminated clothing before reuse.

If swallowed, drink promptly a large quantity of milk or raw egg white. If these are not available, drink a large quantity of water. Avoid alcohol. Call a physician immediately.

Rinse empty container thoroughly with water and discard it.

DO NOT USE, POUR, SPILL or STORE NEAR HEAT OR OPEN FLAME.

NET CONTENTS: _____

DIRECTIONS

Use in hospitals, public rooms, homes, restaurants, barber and beauty shops and pet animal quarters for disinfecting floors, walls, tables, counter tops and other porcelain, enamel, tile, plastic or vinyl surfaces or furnishings.

FOR CLEANING AND DISINFECTING

1. Remove gross surface soils by sweeping, vacuuming, dusting or flushing with water.
2. For cleaning and disinfecting non-porous surfaces (glass, polished metal, smooth tile, plastic, smooth enameled surfaces, glazed ceramics), use a solution of 5 ounces to 3 gallons of this disinfectant per gallon of water. For porous areas (poorly finished wood, pitted or rough metal, unglazed ceramics and tile), areas difficult to clean or contagious disease areas, make a disinfecting solution using 3 ounces of this disinfectant per gallon of water.
3. The disinfecting solution may be applied with a clean mop, sponge or brush. The disinfecting solution may also be applied mechanically through low pressure sprayers having nozzles that will deliver soft, coarse sprays to surfaces. Apply to a wetting concentration. Surfaces contacting food must be thoroughly rinsed with potable water after treatment. Otherwise, rinsing is not required.

FOR DEODORIZING

For garbage cans and similar refuse areas, use a solution of 4 ounces to 3 gallons of water. Spray or wet all surfaces.
