BIO-LAB, INC., Decatur, Georgia 30031

BIO-GUARD FRC-56 concentrated Pool Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action

INSTRUCTIONS

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 2.0 ppm available chlorine. To accomplish this, add 2 oz BIO-GUARD FRC-56 Concentrated Pool Chlorine per 1.000 gallons of pool water. The next morning, add STABILIZER 100 at the rate of 4 oz per 1.000 gallons to stabilize the pool.

BIO-GUARD FRC-56 concentrated Pool Chlorine should be added daily or as needed at the rate of 1/8 to 1/4 oz. per 1,000 gallons of pool water to maintain a chlorine residual at all times of 1 0 ppm to 2 0 ppm as determined by a suitable test kit. The pH should be main tained between 7 2 and 7 6

A shock treatment should be made every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. For the shock treatment, add 2 oz of BIO GUARD FRC 56 concentrated Pool Chlorine per 1 000 gallons of pool water. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual has reached the 1.0 ppm to 2 0 ppm range.

Keep in mind that a slight flexibility must be maintained in the event of heavy accumulations of dust, and dirt caused by storms or super heavy bathing loads which require additional dosages as needed to maintain the chlorine residual between 1.0 ppm, and 1.5 ppm.

BIO-LAB, INC., Decatur, Georgia 30031

BIO-GUARD FRC-56 concentrated Pool Chlorine provides a more stable form of chlorine for easier maintenance of an effective chlorine residual in pool water for disinfecting action

When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 2.0 ppm available chlorine of accomplish this, add 2 oz. chlorine residual of 1.0 ppm to 2.0 ppm available chlorine of accomplish this, add 2 oz. chlorine residual of 1.0 ppm to 2.0 ppm available chlorine of accomplish this, add 2 oz. chlorine per 1.000 gallons of pool water. The next morning, add STABILIZER 100 at the rate of 4 oz per 1.000 gallons to stabiling the pool. BIO-GUARD FRC-56 concentrated Pool Chlorine should be added daily or as needed at the rate of 1/8 to 1/4 oz per 1.000 gallons of pool water to maintain a chlorine residual at all times of 1.0 ppm to 2.0 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6

A shock treatment should be made every week during hot weather or after heavy rains. Less A shock treatment should be made every week during the shock treatment and frequent shock treatments may be made during cool weather. For the shock treatment, add frequent shock treatments may be made during cool weather. For the shock treatment of pool water. 2 oz of BIO GUARD FRC 56 concentrated Poul Chlorine per 1,000 gallons of pool water. Swimmers should not be permitted in the pool after the shock treatment until the chlorine sesional has reached the 1 0 ppm to 2 0 ppm range.

residual has reached the LOppin to 2 oppin range.

Keep in mind that a slight flexibility must be maintained in the event of heavy accumulations of dust and dirt caused by storms or super heavy bathing loads which require additional dosages as needed to maintain the chlorine residual between 1.0 ppm and 1.5 ppm.

DANGER:

KEEP OUT OF REACH OF CHILDREN

Corrosive causes eye damage. Do not get in eyes or on skin. Do not breathe dust. Dust may be harmful if inhaled. May cause skin. nose and throat irritation. Wear safety goggles dust respirator and protective clothing when handling. May be fatal if swallowed. May cause burns to broken skin.

FIRST AID: In case of personal contact remove excess material and flush skin or eyes with cold water for at least 15 minutes. For eyes get medical attention. Clean contaminated clothing before rouse.

If swallowed feed greet or cooked cereal followed by olive on or cooking oil. Call a Physician immediately.

DANGER Strong oxidizing agent Moisture contamination may liberate irritating and hazardous chlorine containing gases. Decomposes at 350 475° F with liberation of harmful gases, in case of decomposition, if possible isolate container in open air or well ventilated area. Flood with large volume of water if ricessary.

Mix only with water. Do not mix with other pool, benutals. Use only dry clean measuring utensits. Store in a cool dry place. Keep closed, when not being used

Do not reuse container. Rinse empty container thoroughly with water and discard

Do not reuse container minse empty container introughly with water should not be discharged where it.

This product is toxic to fish. Treated pont effluent water should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.
