

## USE DIRECTIONS

FOR RESTROOMS AND GENERAL DISINFECTANT of Walls, Floor, Glass, Metal, Plastic, Porcelain, Synthetics and Finished Wood Surfaces and Furnishings, in institutions and industrial areas. Whenever practical, rinse away surface soils with water. For cleaning, use 4 ounces of THIS DISINFECTANT per gallon of water and thoroughly wet the surface to be cleaned. Cleaning may be accomplished with a clean mop, sponge, squeegee, wet vacuum system, or pressure sprayer. For disinfecting surfaces difficult to clean or contagious disease areas, use 8 ounces per gallon of water, thoroughly wetting all surfaces. Any food contact surfaces treated with THIS DISINFECTANT must be thoroughly rinsed with potable water before reuse.

FOR DISINFECTING AND DEODORIZING OF GARBAGE CANS, GARBAGE TRUCKS, INDUSTRIAL WASTE RECEPTACLES AND OTHER GARBAGE HANDLING EQUIPMENT. It is especially important to pre-clean, preferably using a pressure sprayer, in order for the disinfectant to perform properly. Then apply a setting solution of 8 ounces of THIS DISINFECTANT per gallon of water.

FOR HAND CLEANING OR PRESSURE CLEANING OF WALLS, FLOORS AND INDUSTRIAL WORK AREAS. Use 4 ounces per gallon of water. The use of rubber gloves is recommended for personnel doing continuous hand cleaning.

THE DISINFECTANT may be used through automatic floor scrubbing equipment.

## GENERAL INFORMATION

THIS DISINFECTANT is designed to act on surfaces covered with water, improving its wettability. Microorganisms are particularly susceptible to action on sub-visible particles and films and cracks. The exceptional wettability of THIS DISINFECTANT helps in the penetration of the disinfectant into areas that might not otherwise be reached. After the initial demand for disinfection has been satisfied, any remaining DISINFECTANT will continue to have a residual bacteriostatic effect.

Using A O A C test methods, this Disinfectant will kill the following organisms at recommended use dilutions:

**PATHOGENIC BACTERIA**

*Escherichia coli*  
*Pseudomonas aeruginosa*  
*Salmonella choleraesuis*  
*Salmonella typhosa*  
*Staphylococcus aureus*  
*Streptococcus pyogenes*

**FUNGI**

*Aspergillus niger*  
*Candida albicans*  
*Trichophyton interdigitale*
