DIRECTIONS FOR USE GENERAL CLASSIFICATION

Use this product in the manner consistent with the following directions. Do not use this product in any other manner.

In Swimming Pools Bio-Chlor LB-525 is a powerful disinfectant for swimming pools. It kills bacteria, algae, and fungi. It also acts as a mildewicide and a general cleanser. The following directions are for the use of Bio-Chlor LB-525 in swimming pools.

Starting Dose When starting a new pool, use 10-15 lbs. of Bio-Chlor LB-525 per 1000 gallons of water. This will satisfy the initial demand for chlorine and will keep the water clear and free of bacteria, algae, and fungi.

Maintenance Doses Use a maintenance dose of 1 lb. of Bio-Chlor LB-525 per 1000 gallons of water. This will keep the water clear and free of bacteria, algae, and fungi. It will also act as a mildewicide and a general cleanser.

Bio-Chlor LB-525 is also effective against bacteria, algae, and fungi on the edges of the pool. It will also act as a mildewicide and a general cleanser.

Dairy Milking Equipment

Use Bio-Chlor LB-525 to disinfect milking equipment. Drain and wash the equipment with water. Then apply a solution of Bio-Chlor LB-525 to the equipment.

Use Bio-Chlor LB-525 to disinfect milking equipment. Drain and wash the equipment with water. Then apply a solution of Bio-Chlor LB-525 to the equipment.

Food Handling and Processing Equipment

Use Bio-Chlor LB-525 to disinfect food handling and processing equipment. Wash the equipment with water. Then apply a solution of Bio-Chlor LB-525 to the equipment.

Use Bio-Chlor LB-525 to disinfect food handling and processing equipment. Wash the equipment with water. Then apply a solution of Bio-Chlor LB-525 to the equipment.

Use Bio-Chlor LB-525 to disinfect food handling and processing equipment. Wash the equipment with water. Then apply a solution of Bio-Chlor LB-525 to the equipment.
