DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Degrades with age. Use a test kit and increase dosage as necessary to obtain the required level of available chlorine.

In Swimming Pools: [Bio-Chlor LB 1000] {or} [This product] is an effective sanitizer and shock treatment in swimming pool water aiding in the control of bacteria and algae and water clarity. [Bio-Chlor LB 1000] {or} [This product] may be added directly to the pool by pouring along the edges of the pool away from the wall or, since it is a liquid the proper dosage can be fed continuously or intermittently into the pool with an automatic feeder. The pH of the pool water should be maintained in the range of 7.2 - 7.6.

Starting Dose: When opening pool in Spring or starting a new pool use 6 to 8 fluid ounces of [Bio-Chlor LB 1000] {or} [this product] per 1,000 gallons water to provide 5-10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Adjust and maintain pool water pH to between 7.2-7.6. (Remove debris and soils from pool and filter before adding any chlorine.)

Maintenance Doses: Use a chlorine test kit several times a day to measure free available chlorine and add 1 to 2 fluid ounces of [Bio-Chlor LB 1000] {or} [this product] per 1,000 gallons to maintain the required chlorine residual. For pools stabilized with cyanuric acid (s-triazine trione) keep a chlorine residual of 1.0 - 1.5 ppm. For unstabilized pools maintain 0.6 to 1.0 ppm. Follow the directions of your local health department.

Shock Treatment: To rid pool of organic wastes and increase water sparkle and clarity, apply 1 quart of [Bio-Chlor LB 1000] {or} [this product] per each 3,000 gallons of pool water. Treatment should be applied in an area of good circulation and at a time when pool is not in use, preferably at night. Swimming should not be resumed until chlorine level falls to 1.0 - 3.0 ppm. Repeat treatment every other week or weekly if swimming activity is heavy.

Mildew Stain Removal: Use on bathroom grout, tiles, shower stalls, shower curtains, outdoor mats, awnings, moldy exterior paint, walls and ceilings. Add 5 fluid ounces of [Bio-Chlor LB 1000] {or} [this product] to 1 quart water, mix, sponge on the mildew stain. Reapply in 30 days or when mildew growth reoccurs. Do not spray in confined areas without respiratory protection and safety glasses or goggles.

STORAGE AND DISPOSAL: Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. **DO NOT REUSE CONTAINER** but place in trash collection. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive, may cause severe skin and eye irritation or chemical burns to broken skin. Causes eye damage. Wear safety glasses or goggles and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until strong odors have dissipated.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents, etc.) or organic matter (e.g. urine, feces, etc.) will release chlorine gas which is irritating to eyes, lungs and mucous membranes.

{Environmental hazards statement for end-use products in containers of less than 5 gallons (liquid) or less than 50 pounds (solid, dry weight).}

[ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.]

{Environmental hazards statement for end-use products in containers of equal to or greater than 5 gallons (liquid) or equal to or greater than 50 pounds (solid, dry weight).}

[ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.]

ATTENTION: VENTED CAP. KEEP BOTTLE UPRIGHT. Cap will leak if bottle is tipped and damage carpet/cloth on contact.

During transport secure in trunk in upright position only. Use plastic carrier or wedge securely in trunk compartment.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.
