JUL 23 1980
Under the Federal Insecticide,
Fungicide, and Rodenticide Act
registered under
EPA Reg. No.

DIRECTIONS FOR USE

Do not use in violation of Federal law to use this product in a manner inconsistent with its labeling.

When used as directed, this product is effective as a pool water disinfecting agent.

The filter system should be backwashed or properly cleaned and the pH adjusted between 7.4 and 7.6.

It is recommended that the pool be stabilized with 40.50 ppm of trihydroxy triazine cyanuric acid to nullify the disinfection effect of sunlight on chlorine. When using this product, both chlorine and trihydroxy triazine cyanuric acid are required in the water. However, it is necessary to apply chlorine plus with 40.50 ppm of trihydroxy triazine cyanuric acid to effectively maintain the desired level of chlorine. For more information, consult the Environmental Protection Agency's Health and Safety Administration.

DIRECTIONS

For the treatment of swimming pools, spas, hot tubs, and other recreational water bodies. Use according to label directions. Do not use in public water supplies. Do not use in the presence of organic materials. Do not use in the presence of flammable materials.
