THIS DISINFECTANT contains synthetic, biodegradable surfactants that reduce the surface tension of water, improving its wettability. Microbes are capable of mass reproduction in sub-visible pores, scratches and cracks of surfaces. The excellent wettability of THIS PRODUCT improves the penetration of the use solution into areas that otherwise might not be reached.

THIS DISINFECTANT kills a wide variety of gram-positive bacteria, gram-negative bacteria, viruses and pathogenic fungi. It is effective even in hard water up to 400 ppm (23 grains) of hardness. It is also an excellent deodorant and is especially effective in controlling odors that are bacterial in origin.

THIS DISINFECTANT mixes with water to form clear, stable use solutions. Use solutions are non-staining and non-corrosive to plastic, vinyl, synthetics, enamel, tile and most common metals.

WHEN USED AT 1 oz./Gal. on hard, non-porous, inanimate surfaces with light to moderate soil loads, this disinfectant kills:
