ATTACHMENT TO THE REGISTRATION NOTICE

NAME OF PRODUCT: Bioguard Tabgard Packs

EPA Registration No. 5185-370

Date FEB 5 1985

This registration is being issued with the understanding that the derivative of cyanuric acid which is contained in this product is under scrutiny for potential adverse effects to humans. There may be some regulatory actions directed against all registered products containing this chemical as an active ingredient at some time in the future.

BIOGUARD®

TABGUARD® PUCKS

Big 3 Inch

Chlorinating Tablets

Active Ingredients:

Trichloro-s-triazinetriene 99.0%
(available chlorine 90%)

Inert Ingredients 1.0%

KEEP OUT OF REACH OF CHILDREN

⚠ DANGER

(See practical treatment and additional precautions on back panel)

Net Weight: _____ **Lbs.** (_____ **kg.**)

For use in skimmers or with Chlor-Trol Model 1200 and most other FLOW through or soak type chlorinators. Also fits many popular floaters.

STORAGE AND DISPOSAL: Keep product dry in tightly closed original container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container if possible, and flood with large amounts of water to dissolve all material before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal.

PRACTICAL TREATMENT (FIRST AID)

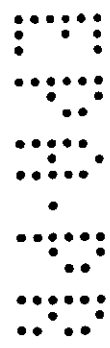

- If swallowed:** Feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately.
- If on skin:** Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.
- If in eyes:** Flush with cold water for at least 15 minutes and get prompt medical attention.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust or fumes. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS-STRONG OXIDIZING AGENT: Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire or explosion. In cases of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

EPA Reg. No. 5185-
EPA Reg. No. 5185-GA-2

BioGuard® TabGuard® Pucks are effective as a pool water disinfecting agent when used as directed. The pool should be stabilized with 30-40 ppm trihydroxy triazine stabilizer to reduce chlorine loss due to sunlight. When using this product, both chlorine and stabilizer are being added to the water. This helps maintain the desired concentration of stabilizer.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

The filter system should be backwashed or properly cleaned and the pH adjusted between 7.4 and 7.6. Before using this product, it is recommended that the pool be super chlorinated so that a chlorine residual of between 1.0 and 3.0 ppm is obtained.

Pucks should be used in various types of proportioning mechanisms such as chlorinators or floaters. Fill unit with pucks and adjust the feeding system used to assure a constant treatment level of 1.0 - 3.0 ppm available chlorine in the pool water normally 1-2 ounces of this product per 10,000 gallons daily. Each puck weighs 6 ounces. Check chlorinator often and refill as needed.

Pucks may also be used in plastic skimmers. Initially, place one puck (6 ounces) per 10,000 gallons pool water in the skimmer. Add additional pucks as required to maintain an available chlorine residual of 1.0 - 3.0 ppm in the pool water.

The regular use of an accurate test kit will determine if further adjustments may be necessary to maintain the recommended level of available chlorine in the pool water.

Do not add any other chemical through the skimmer when using this product, as a potential explosion hazard may occur when pucks have been placed in skimmer or dissolving basket. Do not remove them unless necessary.

Use pucks in skimmer only if skimmer and the piping between skimmer and pump are plastic.

Do not turn off pump for more than 8 hours in vinyl pools when pucks are in skimmer.
