Bio-Lab, Inc.
P.O. Box 300002
Lawrenceville, GA 30049

Subject: Label Amendment – Marketing claims and kit text, alternate use directions
Product Name: BioGuard SpaGuard Brominating Concentrate
EPA Registration Number: 5185-376
Application Date: May 1, 2015
Decision Number: 505850

Dear Jernigan:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Ben Chambliss by phone at (703) 308-8174, or via email at chambliss.benjamin@epa.gov

Sincerely,

A handwritten signature in blue ink, appearing to read "Wanda G. H. for".

[SPA AND HOT TUB SANITIZER]

[1 step fast* dissolving brominating granules]

[Fast* dissolving [sanitizer]]

[*Fast dissolving granules as compared to tablets.]

{Only one of the following four statements can be chosen to be used on a production label at any one time. Use of one of these statements precludes the use of the other three statements from a particular production label.}

[No chlorine odor]

[For low-odor sanitization]

[For clean, odor-free spa water]

[For odor-free spa water]

This product is a practical, easy to use sanitizer for spa and hot tub water. It rapidly and completely dissolves without cloudy or insoluble residue in water to provide effective bromine disinfection. This product may be used as a super oxidation treatment to rid spa and hot tub of organic wastes. [This product may also be used to treat visible algae in spas and hot tubs.] *{This statement will only be used if optional section of directions for Treatment of Visible Algae are included on label}*

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Ensure all spa and hot tub equipment is working properly. Backwash or clean the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6. When using other products as outlined in the directions for this product, always follow directions on those products. Spas should be drained and cleaned at least every 60 days or whenever water becomes difficult to manage or keep clear. Bath oils, salts and lotions should not be used unless specifically formulated for use in spas and hot tubs as they can lead to cloudy water.

SPA AND HOT TUB SANITIZATION: Add 1 level teaspoon of this product per 200 gallons of water with circulation system operating. Test for available bromine and repeat sanitation dose at 15 to 20 minute intervals until a residual of 3-6 ppm is established. It is recommended that a test kit be used regularly to determine when additional doses are needed to maintain a residual of 3-6 ppm bromine.

SUPER OXIDATION: A super oxidation dose is needed to destroy water soluble organic wastes. This may be needed on a daily basis in a heavily used spa or once a week in a moderately used spa. Add 4 teaspoons of this product per 200 gallons of water with circulation system operating.

[TREATMENT OF VISIBLE ALGAE: If visible algae is present, brush spa surfaces and start circulation system operating, without air injection if possible. Add 4 teaspoons of this product for each 200 gallons of water. Allow system to circulate for 15 to 20 minutes. Treatment may be repeated in 24 hours if algae is still present.]

Reentry into treated spas is prohibited above levels of 8 ppm bromine due to risk of bodily injury.

{Alternate Use Directions}

This easy-to-use bromine spa sanitizer dissolves quickly to create clean, sparkling water.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Clorox® Spa™ Smart Tips™:

1. Clean the filter regularly per manufacturer's directions.
2. Maintain a pH of 7.2-7.6 and 3-6 ppm of Bromine.
3. Drain, clean and refill your spa every 60-90 days.

To Sanitize Water: Add 1 teaspoon per 200 gallons of water with circulation system on. Test for available bromine and repeat dose every 15 to 20 minutes until 3-6 ppm is reached. Test water regularly to maintain this sanitizer level.

[[To Shock Water] [SUPER OXIDATION]: With the circulation system on, add 4 teaspoons per 200 gallons of water weekly or after heavy use to maintain clear water.]

Reentry into treated spas is prohibited above levels of 8 ppm bromine due to risk of bodily injury.

STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food or feed by storage or disposal. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive: Causes irreversible eye damage. Causes skin burns. Harmful if swallowed or absorbed through skin or inhaled. Do not get in eyes, on skin or on clothing. Avoid breathing dust. Wear protective eyewear (safety glasses). Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse.

{When First Aid is not located on front panel of label, it will be separated by line rules from adjacent text and be in a different color.}

FIRST AID: **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for treatment advice. **IF SWALLOWED:** Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

[IN CASE OF MEDICAL EMERGENCY, CALL [1-303-623-5716] [1-877-800-5553] [1-866-366-5048] [telephone number supplied by supplemental registrant].]

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood area with large volumes of water.

{Environmental hazards statement for end-use products in containers of less than 50 pounds (solid, dry weight).}

[ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.]

{Environmental hazards statement for end-use products in containers of equal to or greater than 50 pounds (solid, dry weight).}

[ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.]

{{Optional: Text that may be included on Kit Label if this product is sold in a kit including a sanitizer (this registration EPA Reg. # 5185-376), weekly shock-oxidizer (not an EPA registered product) and soothing conditioner (not an EPA registered product).}}

Clorox Spa soft&free spa care kit includes 3 essential products to maintain clean, soft water

For soft, crystal-clear and odor-free spa water

Spas and hot tubs are meant to be enjoyed. Ease into your inviting and stress-free personal oasis.

To fully enjoy your spa, it should be drained and refilled regularly to maintain the highest quality water and keep equipment operating at peak performance. Fortunately, the Soft&Free™ Spa Care Kit lasts 60-90 days, making it simple to remember when to drain, clean and refill your spa.

Spa Size	Kit Lasts*
<300 Gallons	More than 3 months
300-400 Gallons	~ 3 months
400-500 Gallons	~ 2 months
>500 Gallons	Less than two months
*may vary slightly based on usage habits	

Free yourself from complicated spa care routines with this simple to use Clorox® Spa™ Soft&Free™ Spa Care Kit.

This kit provides the three essential products every spa should have to maintain clear, comfortable water, including a sanitizer, weekly shock-oxidizer and soothing conditioner.

Now you can create spa water that is clean, clear and feels soft on skin and hair for a soaking experience you're sure to remember.

{{Kit claims for sanitizer in kit (this registration EPA Reg. # 5185-376)}}

Clean the water

- Test and add regularly
- Maintain 3-6 ppm
- Kills bacteria for clean water

{Kit claims for a non-EPA registered weekly shock-oxidizer in kit.}

Clear the water

- Use weekly and after heavy use
- Removes contaminants* for clear water

*such as [sweat], [lotion], [make-up], and [oils]

{Kit claims for a non-EPA registered water conditioner in kit.}

Enhance the water

- Add a start-up dose
- Then top-off weekly
- Creates silky soft water

Free yourself from
complicated spa care routines
with this simple-to-use
Clorox® Spa™
Soft&Free™ Spa Care Kit.

Now you can create spa water that is clean, clear and feels soft on skin and hair for a soaking experience you're sure to remember.
