NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

1. Submit (site) all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Add the phrase "EPA Registration No. 5185-307" to your label before you release the product for shipment.
3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

4. Submit a 12 month storage stability study within 15 months.

Swiftabs (TM) are a fast and easy way to add chlorine and stabilizer directly to your skimmer. Swiftabs usually dissolve within one hour of application, depending on water temperature and the rate at which your pump operates. Each 1/2 ounce tablet provides 1 ppm of chlorine per 2000 gallons of pool water.

Before adding Swiftabs(TM), the water should be stabilized to prevent loss of chlorine to sunlight. Initially, chlorine stabilizer should be established in a range of 30-40 ppm. Additional stabilizer applications are generally not necessary since Swiftabs(TM) provide both free chlorine and stabilizer.

DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Your water should be regularly tested to maintain a pH of 7.4-7.6 and a free chlorine level of 1-3 ppm. If chlorine levels are less than 1 ppm, add two Swiftabs(TM) per 2000 gallons. If less than 2 ppm, add one Swiftab(TM) per 2000 gallons. When testing reveals a free chlorine level of 2 ppm or higher, no application is needed.

Because Swiftabs(TM) are added directly to the skimmer, the basket should be cleaned before application. The pump should be on and water flowing through the basket at least 3 hours after Swiftabs(TM) are added to insure that the tablets are completely dissolved.

No other chemicals should be added to the skimmer or mixed with the tablets until they are fully dissolved, since a hazardous chemical reaction may occur. Also, the tablets should not be allowed to come into contact with vinyl liners or other bleachable surfaces.

Swiftabs(TM) should not be used in chlorinators.

STORAGE AND DISPOSAL: Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal, or cleaning of equipment.

PRACTICAL TREATMENT (FIRST AID): If swallowed: Feed bread, soaked in milk followed by olive oil or cooking oil. Call a physician immediately.

If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

If inhaled: Remove victim to fresh air. Call a physician.

PRECAUTIONARY STATEMENTS
