This product is specifically formulated for use in automatic type feeders. It provides highly effective pool water sanitation and algae control when used in this manner. This combination of ingredients not only provides efficient sanitation but also enhances the water quality to reduce potential eye and skin irritation. This product is formulated to dissolve more cleanly and uniformly in automatic feeders thereby reducing plugging, fouling, maintenance requirements and adjustments.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Prior to using this product, the filter system should be properly cleaned and backwashed and the pool water pH adjusted to 7.2-7.6. It is recommended that the pool be superchlorinated to establish a chlorine residual of 1.0-3.0 ppm of free chlorine.

INITIAL APPLICATION: This product is specially designed for use in automatic type feeders except for automatic bromine type feeders (See Caution below). Turn the pump off before opening the feeder housing. Stand to the side of the feeder and carefully remove the feeder lid allowing any pressure that may have built up to bleed off. Inspect the reservoir and clean thoroughly if any build-up of greasy deposits, dirt or any other debris are present in the feeder. Prior to adding this product to the feeder, refer to the operating instructions provided by the manufacturer of the unit. Fill the feeder according to the operating instructions and reclose making sure the feeder lid is securely tightened. Turn on the pump to check the system for proper sealing. Adjust the feeder control rate according to the manufacturers instructions to provide a

constant treatment level of 1-3 ppm free chlorine in the pool water. Proper feed rate is determined by regular testing with a quality pool water test kit.

ROUTINE MAINTENANCE: Test pool water regularly (at least weekly) and check feeder weekly, refilling as needed. Add additional product as needed to maintain a free chlorine level of 1-3 ppm in the pool water. Regular use of a test kit is recommended to make certain adequate levels of chlorine sanitizer and proper pH are being maintained in the pool water.

CAUTION: Do not use this product in automatic brominators or skimmers. Use of this product through a bromine type feeder or skimmer could cause an adverse chemical reaction or explosion resulting in serious bodily injury, death or property damage.

REENTRY into treated swimming pools is prohibited above levels of 3 ppm chlorine.

STORAGE AND DISPOSAL: Do not contaminate food or feed by storage, disposal, or cleaning of equipment. Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all material before discarding this container. **CONTAINER DISPOSAL:** Do not reuse container, but place in trash collection.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:
DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or safety glasses and rubber gloves when handling this product. Irritating to nose and throat. Avoid breathing dust. Remove and wash contami-

nated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT: Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, chlorine gas (and possible fire and explosion). In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood area with large volumes of water, if necessary.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with direction.
